experience, much additional time and efforts are required to be devoted to the preparation and release of quarterly reporting. Our Management is currently considering the adoption of mandatory financial reporting only with a view to reserving more Management time and Company's resources for operational matters and business development, which will be in the interest of the Company and shareholders as a whole. We are of the view that the current regime of financial reporting and disclosure requirements under the Listing Rules can provide sufficient and timely information to the shareholders and investors.

See comments for Q9. But if quarterly reporting were to be introduced, we agree that the printing and mailing of hard copies of the quarterly reports should not be required. We also noted it is proposed that copies of the quarterly report would be made available to shareholders on request (paragraph 64 of the Consultation Paper refers). Since the quarterly reports will be published on the HKEx website and the listed issuer's own website, we think that issuers shall be allowed to charge a reasonable fee per sheet together with the postage when copies of quarterly report are requested to cover the administrative cost.
