Content of the proposed Environmental, Social and Governance Reporting Guide

Introduction

3. Do you agree with the Introduction section?

The proposed Introduction section states:

- 1. This guide sets out Environmental, Social and Governance ("ESG") subject areas, aspects, general disclosure and key performance indicators ("KPIs").
- 2. This guide is not comprehensive. We encourage an issuer to identify and disclose additional ESG issues and KPIs that are relevant to its business. It may also refer to existing international ESG reporting guidance for its relevant industry or sector.
- 3. An issuer may adopt a higher level of ESG reporting based on international guidance and standards.
- 4. An issuer may disclose the ESG information in its annual report regarding the same period covered in the annual report, or in a separate report, in print or on its website. Where the information is included in a separate report, an issuer is free to report on any period.
- 5. It is important to involve the board of directors in preparing the ESG report. The board of directors is responsible for ESG reporting but it may delegate the task of compiling the ESG report to its employees or a committee that reports to the board.

	Yes
X	No

If your answer is "No", please give reasons and alternative views.

- the introduction should say that these guidelines outline a minimum starting point for companies and should be seen as a starting point. Companies are encouraged (rather than "may") to look towards global guidelines as they evolve their reporting

- point 2: issuers should be specifically encouraged to develop reporting that is "fit for purpose" and reflects the company's key areas of risk and opportunity and demonstrates an integration with the corporate strategy the issuer has in place -point 4: issuers should be encouraged to always report in the same time period as their financial reports

General Approach

4. Do you agree with the guidance under the General Approach section?

The proposed General Approach section states:

Identify subject areas, aspects and indicators that are relevant

- 8. Not all ESG subject areas, aspects and KPIs in this Guide may be relevant to an issuer's business. Also, some may be more important to an issuer's business than others. For example, product responsibility, an ESG aspect, may be important to a retailer.
- 9. The ESG report could prioritise ESG subject areas, aspects and KPIs that are material in the context of its corporate strategy, which could be given prominence in the report.
- 10. It is unnecessary to report on all subject areas, aspects and KPIs. An issuer could identify and report on relevant ESG subject areas, aspects and KPIs that have material environmental and social impacts. Materiality can be addressed in strategic, operational and financial terms.

Engage stakeholders

- 11. It is important to engage stakeholders to identify material aspects and KPIs and understand their views. Stakeholders are parties that have interests in or are affected by the decisions and activities of an issuer. They may include shareholders (including independent shareholders), business partners, employees, suppliers, sub-contractors, consumers, regulators and the public.
- 12. The ESG report could disclose the issuer's stakeholders and the basis for their identification. It may also disclose the activities the issuer has arranged to engage stakeholders, the objectives and how it has responded to stakeholders' views. Stakeholder engagement may be conducted through meetings (e.g. personal or annual general meetings), conferences, workshops, advisory committees, round-table discussions, focus groups, questionnaires, web-based forums and written consultations.
- 13. The ESG report may also disclose a mechanism for stakeholders to provide feedback.

X	Yes		
	NT		

If your answer is "No", please give reasons and alternative views.

Point 10: choice of KPI's should be based on both relevance and materiality New point: issues are encouraged to develop reporting that demonstrates the integration of a consideration of sustainability issues in the long-term strategic planning process of the issuer.

Reporting guidance

5. Do you agree with the guidance under the Reporting Guidance section?

The proposed Reporting Guidance section states:

Scope of reporting

14. The ESG report could state which entities in the group and/or which operations have been included for the report. If there is change in the scope, the issuer could explain the difference and reason for change.

Approaches to reporting

- 15. Once an issuer starts reporting, it could continue to do so regularly. The aspects and KPIs reported could be consistent for each period or there could be an explanation of the changes. An issuer may also explain why some aspects and KPIs are not reported.
- 16. An ESG report could state the issuer's ESG management approach, strategies, priorities, objectives and explain how they relate to its business. It could discuss the issuer's management, measurement and monitoring system to implement its ESG strategies.
- 17. An ESG report could also discuss ESG opportunities, risks, challenges and how they are addressed. For example, a telecommunication company may see an opportunity to promote teleconferencing as an alternative to travel due to climate change concerns. An information and technology company may see the damage to its reputation from a breach in consumer privacy as an ESG risk.

Reporting on line items

- 18. The Guide does not provide a definition for each KPI. An issuer could explain how the KPIs are calculated and include information that is necessary for interpreting the KPIs. It may use the same definition and calculation method each period for comparison over time. If there is a change to the definition or calculation method, the issuer could explain the difference and reason for the change.
- 19. Over time, an issuer may present time series of data for comparison over a period already reported on. The time period used may be consistent for every report.
- 20. An issuer may report line items with objective and representative industry benchmarks.
- 21. Quantitative information could be presented in a table format.
