Content of the proposed Environmental, Social and Governance Reporting Guide

Introduction

3. Do you agree with the Introduction section?

The proposed Introduction section states:

- 1. This guide sets out Environmental, Social and Governance ("ESG") subject areas, aspects, general disclosure and key performance indicators ("KPIs").
- 2. This guide is not comprehensive. We encourage an issuer to identify and disclose additional ESG issues and KPIs that are relevant to its business. It may also refer to existing international ESG reporting guidance for its relevant industry or sector.
- 3. An issuer may adopt a higher level of ESG reporting based on international guidance and standards.
- 4. An issuer may disclose the ESG information in its annual report regarding the same period covered in the annual report, or in a separate report, in print or on its website. Where the information is included in a separate report, an issuer is free to report on any period.
- 5. It is important to involve the board of directors in preparing the ESG report. The board of directors is responsible for ESG reporting but it may delegate the task of compiling the ESG report to its employees or a committee that reports to the board.

General Approach

4. Do you agree with the guidance under the General Approach section	4.	Do you agre	ee with the 2	guidance	under the	General.	Approach	sectio
--	----	-------------	---------------	----------	-----------	----------	----------	--------

The proposed General Approach section states:

Identify subject areas, aspects and indicators that are relevant

- 8. Not all ESG subject areas, aspects and KPIs in this Guide may be relevant to an issuer's business. Also, some may be more important to an issuer's business than others. For example, product responsibility, an ESG aspect, may be important to a retailer.
- 9. The ESG report could prioritise ESG subject areas, aspects and KPIs that are material in the context of its corporate strategy, which could be given prominence in the report.
- 10. It is unnecessary to report on all subject areas, aspects and KPIs. An issuer could identify and report on relevant ESG subject areas, aspects and KPIs that have material environmental and social impacts. Materiality can be addressed in strategic, operational and financial terms.

Engage stakeholders

- 11. It is important to engage stakeholders to identify material aspects and KPIs and understand their views. Stakeholders are parties that have interests in or are affected by the decisions and activities of an issuer. They may include shareholders (including independent shareholders), business partners, employees, suppliers, sub-contractors, consumers, regulators and the public.
- 12. The ESG report could disclose the issuer's stakeholders and the basis for their identification. It may also disclose the activities the issuer has arranged to engage stakeholders, the objectives and how it has responded to stakeholders' views. Stakeholder engagement may be conducted through meetings (e.g. personal or annual general meetings), conferences, workshops, advisory committees, round-table discussions, focus groups, questionnaires, web-based forums and written consultations.
- 13. The ESG report may also disclose a mechanism for stakeholders to provide feedback.

Reporting guidance

5.	Do vou agree	with the guid	lance under the	Reporting (Guidance section?

The proposed Reporting Guidance section states:

Scope of reporting

14. The ESG report could state which entities in the group and/or which operations have been included for the report. If there is change in the scope, the issuer could explain the difference and reason for change.

Approaches to reporting

- 15. Once an issuer starts reporting, it could continue to do so regularly. The aspects and KPIs reported could be consistent for each period or there could be an explanation of the changes. An issuer may also explain why some aspects and KPIs are not reported.
- 16. An ESG report could state the issuer's ESG management approach, strategies, priorities, objectives and explain how they relate to its business. It could discuss the issuer's management, measurement and monitoring system to implement its ESG strategies.
- 17. An ESG report could also discuss ESG opportunities, risks, challenges and how they are addressed. For example, a telecommunication company may see an opportunity to promote teleconferencing as an alternative to travel due to climate change concerns. An information and technology company may see the damage to its reputation from a breach in consumer privacy as an ESG risk.

Reporting on line items

- 18. The Guide does not provide a definition for each KPI. An issuer could explain how the KPIs are calculated and include information that is necessary for interpreting the KPIs. It may use the same definition and calculation method each period for comparison over time. If there is a change to the definition or calculation method, the issuer could explain the difference and reason for the change.
- 19. Over time, an issuer may present time series of data for comparison over a period already reported on. The time period used may be consistent for every report.
- 20. An issuer may report line items with objective and representative industry benchmarks.
- 21. Quantitative information could be presented in a table format.

9.	Do you agree to include KPI A1.1: "Total workforce by employment type, age grou and geographical region"?				
	☐ Yes				
	No				
	If your answer is "No", please give reasons and alternative views.				
	The Exchange should consider including the workforce of headquarters and major subsidiaries of a listed issuer instead of disclosing the total workforce.				
10.	Do you agree to include KPI A1.2: "Employee turnover rate by age group and geographical region"?				
	Yes				
	No No				
	If your answer is "No", please give reasons and alternative views.				
	If your answer is "No", please give reasons and alternative views. The turnover rate varies based on a number of factors such as job nature, therefore such KPI may not be meaningful.

Aspect B1	Emissions
ASDECT DI	Elilissions

25. Do you agree with the following general disclosure for Aspect B1: Emissions?

Information on:
(a) the policies; and
(b) compliance and material non-compliance with relevant standards, rules and regulations
on air and greenhouse gas emissions, discharges into water and land, generation of hazardous and non-hazardous wastes, etc.
Air emissions include NO_X , SO_X , and other pollutants regulated under national laws and regulations.
Greenhouse gases include carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons and sulphur hexafluoride.
Hazardous wastes are those defined by national regulations.
⊠ Yes
□ No
If your answer is "No", please give reasons and alternative views.
Do you agree to include KPI B1.1: "The types of emissions and respective emissions data"?
☐ Yes
No
If your answer is "No", please give reasons and alternative views.

The identification of emissions does not guarantee the success in limiting the emissions because it is the policy for reducing emissions that matter. On the one

hand, the burden on the listed issuers in collecting emissions data will be high and the time spent will be lengthy, while on the other hand the result is not certain.

27.	Do you agree to include KPI B1.2: "Greenhouse gas emissions in total (in tonnes) and where appropriate, intensity (e.g. per unit of production volume, per facility)?
	Yes
	⊠ No
	If your answer is "No", please give reasons and alternative views.
	Same as question number 26.
28.	Do you agree to include KPI B1.3: "Total hazardous waste produced (in tonnes) and where appropriate, intensity (e.g. per unit of production volume, per facility)"?
	Yes
	⊠ No
	If your answer is "No", please give reasons and alternative views.
	Stakeholders may not be able to derive the meaning and significance by only the total amount of waste produced and its intensity. Instead, it will be more informative and comprehensible to include the respective percentages of hazardous waste produced.
29.	Do you agree to include KPI B1.4: "Total non-hazardous waste produced (in tonnes) and where appropriate, intensity (e.g. per unit of production volume, per facility)"?
	Yes
	No
	If your answer is "No", please give reasons and alternative views.
	Same as question number 28.
30.	Do you agree to include KPI B1.5: "Description of measures to mitigate emissions and results achieved"?

	Resources may be used in production, in storage, transportation, in buildings, electronic equipment, etc.		
	⊠ Yes		
	□ No		
	If your answer is "No", please give reasons and alternate views.		

34.	Do you agree to include KPI B2.1: "Energy consumption by type (e.g. electricity, gas or oil) in total (kwh in '000s) and intensity (e.g. per unit of production volume, per facility)"?
	Yes
	⊠ No
	If your answer is "No", please give reasons and alternate views.
	It is believed that an approximate range would be sufficient otherwise the competitors will easily know the operating costs of a listed issuer.
35.	Do you agree to include KPI B2.2: "Water consumption in total and intensity (e.g. per unit of production volume, per facility)"?
	Yes

	If your answer is "No", please give reasons and alternative views.		
	It is impossible to estimate the total paper used for a listed issuer with many subsidiaries.		
42.	Do you agree to include KPI B3.2: "Paper use efficiency initiatives and results achieved"?		
	⊠ Yes		
	□ No		
	If your answer is "No", please give reasons and alternative views.
