

Part B Consultation Questions – Volatility Control Mechanism

Please indicate your preference by checking the appropriate boxes and provide reasons to support your views. Where there is insufficient space, please attach additional pages as necessary.

1. Do you support the introduction of an instrument-level VCM based on a dynamic price limit model in Hong Kong?

Yes

No

Please give reasons for your view.

We had some callable bull bear contracts that created a lot of volatility in market before as warrant trades tried to knock out the options outstanding. VCM will increase the cost of share price manipulation.

2. Do you agree that the proposed VCM model should only be applied to the HSI and HSCEI constituent stocks in the securities market?

Yes

No

Please give reasons for your view.

It should apply MSCI Hong Kong and MSCI China stocks also

3. Do you agree that the proposed VCM model should only be applied to the HSI, HHI, MHI & MCH (spot month and the next calendar month) index futures in the derivatives market?

Yes

No

Please give reasons for your view.

4. Do you agree that the market should have a 15-minute uninterrupted trading period before the end of the last continuous trading?

Yes

No

Please give reasons for your view.

Uninterrupted trading period can avoid anyone manipulating the closing reference price for the CAS.

5. Do you agree with the proposed reference price for the securities market, namely the price of last trade 5 minutes ago? If not, what would you prefer?

Yes

No, I would prefer: _____

Please give reasons for your view.

6. Do you agree with our proposed reference price for the derivatives market, namely the price of last trade 5 minutes ago? If not, what would you prefer?

Yes

No, I would prefer: _____

Please give reasons for your view.

7. Do you agree with the proposed triggering level for the securities market, namely 10% from the reference price across the proposed instruments covered by the VCM? If not, what level would you prefer?

Yes

No, level that I would prefer: _____

Please give reasons for your view.

8. Do you agree with the proposed triggering level for the derivatives market, namely 5% from the reference price across the proposed instruments covered by the VCM? If not, what level would you prefer?

Yes

No, level that I would prefer: 10%

Please give reasons for your view.

Derivatives tend to be more volatile than underlying securities. It is strange we put smaller band on derivative than securities in my mind. We should put all at 10% band to avoid confusion.

9. Do you agree that a maximum of two VCM triggers per trading session per instrument should be imposed to minimise market interruption?

Yes

No, I would prefer: _____

Please give reasons for your view.

The purpose of cooling period, in my view, is to make sure more market participants aware of the latest trading price of the stock so that they can make their trading decisions. Once VCM started, it will attract a lot of attention by market participants. Two VCMs are enough in my view.

10. Do you support trading within a price limit during the cooling-off period? If not, do you prefer another approach?

Yes

No, another approach that I prefer: _____

Please give reasons for your view.

11. After the cooling-off period, do you support resuming the same dynamic price limit monitoring mechanism (i.e. $\pm 10\%$ ($\pm 5\%$) from the last trade 5 minutes ago in the securities (derivatives) market)? If not, do you prefer another approach?

Yes

No, I would prefer: _____

Please give reasons for your view.

12. Do you have any other suggestions on enhancing the resumption procedures?

Yes

No, I would prefer: _____

Please give reasons for your view.

14. Do you agree with the additional market data dissemination for the proposed VCM model? If not, what would you propose and why?

Yes

No, I would propose: _____

Please give reasons for your view.

15. If a VCM is triggered for a given instrument, should trading of related instruments (e.g. futures contract of different contract months) on the same underlying continue as normal?

Yes

No

Please give reasons for your view.

16. If a VCM is triggered for a given instrument, should trading of derivatives (e.g. single stock options or warrants) of that instrument continue as normal?

Yes

No

Please give reasons for your view.

17. Do you have any other comments on the VCM proposal?

Part C Consultation Questions – Closing Auction Session

18. Do you support the introduction of the new CAS model in the Hong Kong securities market?

The current system encourages the index trackers to push up the share price of a newly added constituent stock to make sure their purchase price is below the day end price of the rebalancing. CAS can avoid such a manipulation.
