**Clearing and Settlement Arrangements Relating to Shares Collateral and Exercise / Assignment of Adjusted Stock Option Series**

**Shares Used as Cover Collateral**

All covered call positions will be discovered automatically after the day-end margin calculation on the business day immediately before the ex- date. Participants are requested to cover, if possible, those naked short call positions of the adjusted stock option series before market open of the ex- date. Otherwise, these naked short call positions will become marginable in the subsequent intra-day or day-end margin calculation. Since the contract sizes of the adjusted stock option series will carry odd lots and fractional shares, participants who wish to cover any adjusted stock option series must use the exact odd quantity of stock while standard board lots can only be used to cover the standard stock option series.

**Pending Stock Positions**

Pending stock positions resulting from exercise / assignment effected on or before the business day immediately before the ex-date will be cum entitlement and settled via CCASS.

**Settlement of Exercised Options Trades**

The exercise and assignment of contracts in adjusted stock option series will result in odd lots and fractional shares. The integral number of shares (including the odd lots) will be settled via CCASS under normal procedures. The fractional shares of each contract exercised will be settled in cash via CCMS on the day of exercise. The actual cash settlement amount of the fractional shares is the difference between the exercise price of the stock option series and the market closing price of the underlying stock on the day of exercise times the fractional shares quantity for each contract exercised/assigned.

The settlement of fractional shares in cash is not liable to stamp duty provided that the contract notes so executed by the party for the sale and purchase of shares arising from the exercise of an option contract only include the whole number of shares.

Exercise and assignment of standard stock option series will result in stock settlement obligation of a standard board lot of shares per contract and settled in CCASS under normal procedures.
