

3 Getting Started For Client Connect

3.2 SCREEN STANDARDS

This section explains

- The screen layout of Client Connect dashboard
- Screen Types and Screen Flow in Client Connect
- Entering data in Client Connect

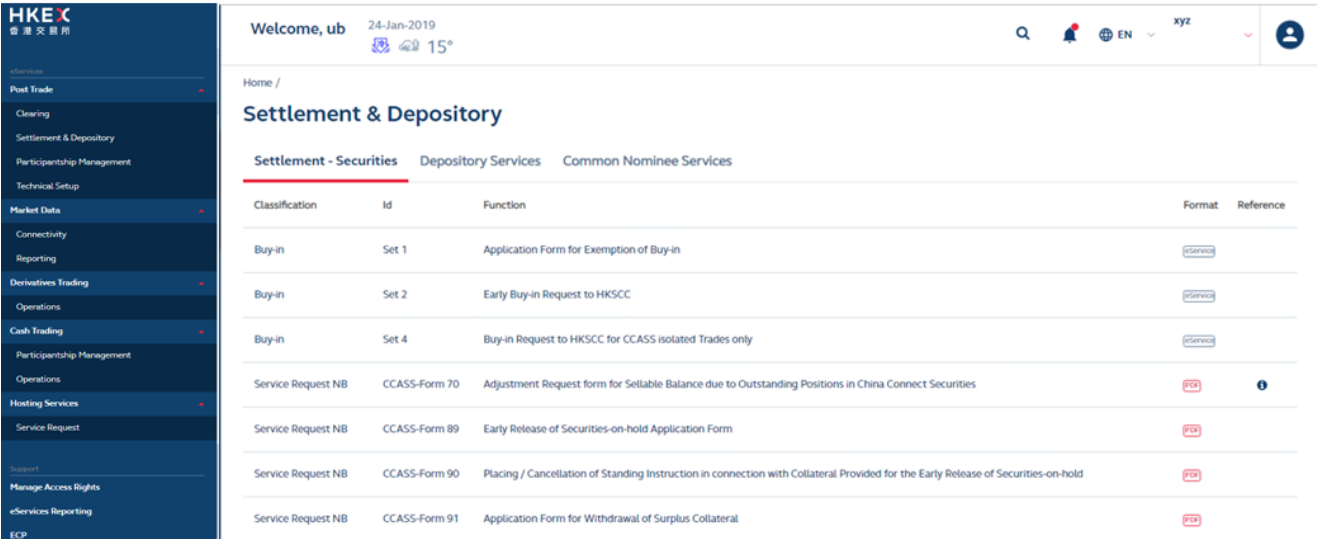

THE SCREEN LAYOUT OF CLIENT CONNECT DASHBOARD

The screen layout is mainly divided into (a) Main dashboard area, (b) User banner and (c) Footer area.

(a) Main Dashboard Area:

Navigation menu is located on the left of the screen. Users can access different functions through the menu based on their roles and access rights. In general, only Business users can access eServices and only Client Connect Delegated Administrators (CCDAs) can go through **MANAGE ACCESS RIGHTS** to perform access management.

When users click on the navigation menu, the system will bring users to the corresponding service page in the area on the right.

The screenshot displays the Client Connect dashboard interface. On the left is a dark blue navigation menu with categories like 'Post Trade', 'Market Data', and 'Support'. The main content area shows a 'Welcome, ub' banner with the date '24-Jan-2019' and weather '15°'. Below the banner, the 'Settlement & Depository' section is active, with sub-tabs for 'Settlement - Securities', 'Depository Services', and 'Common Nominee Services'. A table lists various services with columns for Classification, Id, Function, Format, and Reference.

Classification	Id	Function	Format	Reference
Buy-in	Set 1	Application Form for Exemption of Buy-in	eService	
Buy-in	Set 2	Early Buy-in Request to HKSCC	eService	
Buy-in	Set 4	Buy-in Request to HKSCC for CCASS isolated Trades only	eService	
Service Request NB	CCASS-Form 70	Adjustment Request form for Sellable Balance due to Outstanding Positions in China Connect Securities	PDF	?
Service Request NB	CCASS-Form 89	Early Release of Securities-on-hold Application Form	PDF	
Service Request NB	CCASS-Form 90	Placing / Cancellation of Standing Instruction in connection with Collateral Provided for the Early Release of Securities-on-hold	PDF	
Service Request NB	CCASS-Form 91	Application Form for Withdrawal of Surplus Collateral	PDF	

The upper right area provides a quick path to **Tasks, Notifications, Events** and **History**:

Tasks

When makers submit an eService for approval, the system will create a task on this list. Users can click on each task to quickly access the specific eService. The system will also create the same task to remind checkers to approve.

Section 3.2 Screen Standards

Tasks	Notifications	Events	History	
Classification	Company Participant ID	Details	Last Update Date	Job Status

- Contact
- FAQ
- Site Map
- Site Maintenance
- Disclaimer
- Hyperlink Policy
- Terms & Conditions

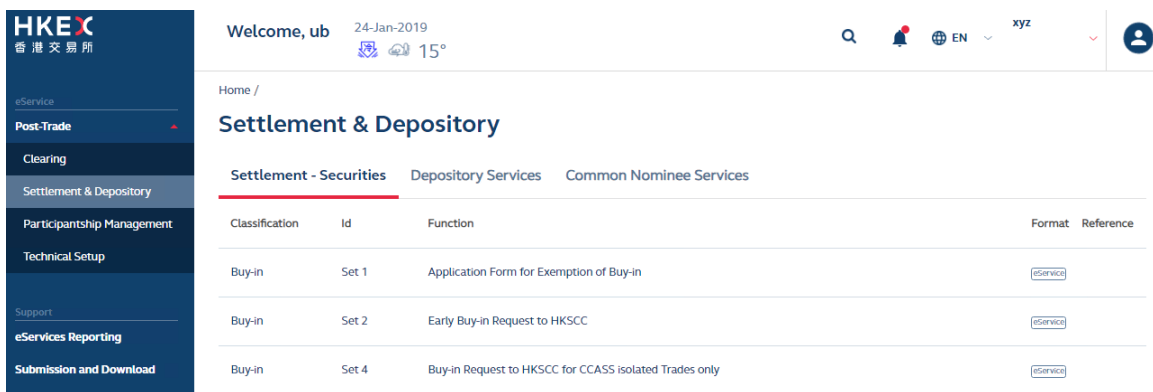

SCREEN TYPES AND SCREEN FLOW IN CLIENT CONNECT

There are three main types of screens in Client Connect, each with a different purpose. A screen's type is usually indicated by its name. Screen types available for each function may vary, depending on the features of each function. Only one session of login should be opened during Client Connect operations.

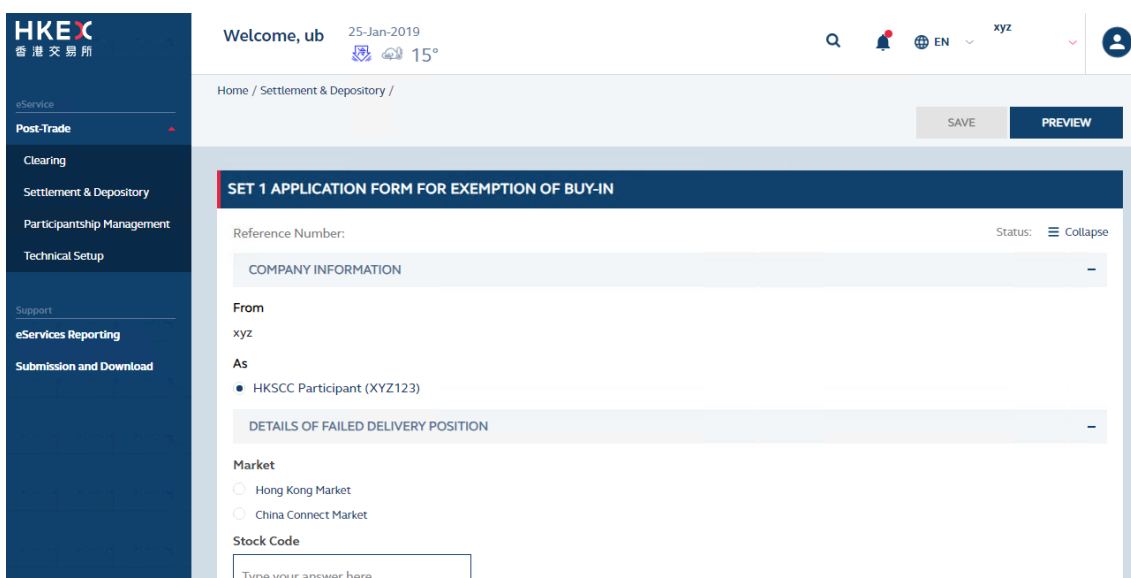

- List Screen** A list screen displays a list of records allows access to a particular record from the list.
- Details Screen** A details screen either displays details of a particular record for enquiry or deletion or allows details to be input or changed.
- Confirmation Screen** A confirmation screen displays details of a particular record to allow user to check its correctness before confirming the action. If the details of the record are correct, the user should click the **CONFIRM** button to submit to next step. If an error is found, click the **REVERT** at the top to return the form to the maker for further update.

In general, screen flows in Client Connect works as follows:

- eServices can be accessed from the navigation menu on the left.
- Click on each post-trade category to enter the page containing related eServices and PDF forms.

- Only functions that the user has access rights to access will be shown.
- Click on eService to enter the Detail Screen of each eService.

ENTERING DATA IN CLIENT CONNECT

Users can only enter or change data in fields that accept input of data. All other fields are protected to display information only. Usually the flashing cursor appears in the field where users can enter or change data. If it does not, move the cursor to the field then type in the data. If users are changing data, the data entered automatically overtypes the original one. After entering data, click the necessary button to send the information to HKEX via Client Connect.

(a) Built-in validation

There is built-in validation in eServices forms to remind users of invalid or missing input of data. Users are unable to proceed without entering such required data correctly.

POSITION TO BE BOUGHT-IN

Stock Code

Stock Code is missing
