通告 CIRCULAR

Subject: Reminder for the Effective Date for the Extension of Volatility Control Mechanism

("VCM") and Dynamic Price Banding ("DPB") Mechanism to Hang Seng TECH Index

("HTI") Futures

Enquiry: HKATS Hotline<sup>1</sup> Tel: 2211-6360

Reference is made to the circular dated 10 August 2022 (Ref. No.: MO/DT/205/22), the extension of VCM and DPB to HTI Futures applicable contracts (see attachment I) will be effective on Monday, 17 October 2022 ("the Effective Date").

## **Brief Description of VCM**

VCM protects the market from extreme volatility. It is triggered when a potential execution price deviates by more than 5% from the last traded price 5 minutes ago. Once VCM is triggered, the market will enter into a cooling-off period for 5 minutes where trading is only allowed within a predefined price band. Normal trading with VCM monitoring will resume after the lapse of the cooling-off period. Please refer to the <u>Trading Mechanism of VCM</u> on HKEX website for more details.

## **Brief Description of DPB**

DPB prevents potential market disruption by rejecting orders with obvious price deviation. It rejects input of buy orders with a limit price higher than the upper price band or sell orders with a limit price lower than the lower price band. The upper and lower price bands are symmetrically applied to both the upside and downside of the prevailing market price level. The price bands will be recalculated when there is a change in the prevailing market price level. Please see Appendix 5 of the HKATS User's Guide for more details.

<sup>&</sup>lt;sup>1</sup> All calls to the HKATS hotline would be recorded. Please refer to the following link for HKEX privacy policy statement: <a href="http://www.hkex.com.hk/eng/global/privacy\_policy.htm">http://www.hkex.com.hk/eng/global/privacy\_policy.htm</a>

EPs should coordinate with, including but not limited to, the operations team, IT team and external vendors for the operational and technical readiness. EPs should also inform their clients about the extension of applicable markets in VCM and DPB.
