

HONG KONG EXCHANGES AND CLEARING LIMITED

GUIDE ON TRADING ARRANGEMENTS FOR SELECTED TYPES OF CORPORATE ACTIONS

28 November 2008 (Updated 30 August 2019)

1. Introduction

- 1.1 The Listing Department has produced this Guide on Trading Arrangements for Selected Types of Corporate Actions (CA) which outlines key issues and best practices in relation to schedule setting, provision of information and trading arrangements for:
- i. Rights issue
 - ii. Open offer
 - iii. Share consolidation or sub-division
 - iv. Change in board lot size
 - v. Change of company name or addition of Chinese name
- 1.2 The responsibility for disclosing of information in announcements and circulars, and complying with Listing Rules rests firmly with issuers and their directors. This Guide does not form part of the Listing Rules and does not in any way amend or vary an issuer's obligations under the Listing Rules, nor does it remove the need for issuers to make their own judgement on what information should be disclosed in relation to their corporate actions. In case of doubt, issuers are encouraged to consult their contact persons in the Listing Department.

2. Issues for attention

- 2.1 Issuers should be aware that, as well as the Listing Rules and this Guide, the scheduling and arrangements of corporate actions may be also subject to statutory laws and regulations in their jurisdiction of incorporation. For instance, the Company Ordinance has certain requirements on the cumulative book closure period.
- 2.2 The guidelines in this document are developed and organised by types of corporate actions. In practice, issuers may initiate complicated events, involving multiple types of corporate actions. While the guidelines in this document refer to equities, they may also apply to other types of securities such as warrants and debt securities. If issuers encounter any difficulties in applying the guidelines, they can contact the designated Listing Officer for advice.
- 2.3 Unless otherwise specified, any reference to “day” or “days” in this document refers to calendar days.
- 2.4 In this document, “business day” refers to any day on which the Stock Exchange of Hong Kong (“the Exchange”) is open for business to deal in securities, also called a “trading day”. The term “settlement day” refers to a business day on which the settlement services of Central Clearing and Settlement System (“CCASS”) are available for use by CCASS Participants; i.e. business days except for Christmas Eve; New Year's Eve and Lunar New Year's Eve (i.e. these are half trading days on which CCASS does not offer settlement services).

2.5 International Securities Identification Number (“ISIN”): Issuers should contact corresponding numbering agencies according to their place of incorporation to obtain new ISIN for the securities to be created as a result of the following corporate actions¹:

- i. Nil paid rights shares in rights issue
- ii. Issue of a class of securities new to listing
- iii. Share consolidation or sub-division
- iv. Change of domicile or group reorganization
- v. Change of company name or addition of Chinese name (if there is exchange of share certificates²).
- vi. Capital reduction or change in board lot size (if there is exchange of share certificates²).

¹ ISIN is extensively used by International brokerage houses/ investors for settlement / clearing as well as trading. For ease of reference, issuers may refer to (i) the ISIN Uniform Guidelines for guidance on application of ISIN at https://www.anna-web.org/wp-content/uploads/2018/05/ISIN-Guidelines-Version-14_clean.pdf and (ii) the directory to the local numbering agencies at <https://www.anna-web.org/members-db/> and <http://www.anna-web.org/members/substitute-numbering-agencies/>.

² Whether a change in ISIN is required should be subject to the decision / operation procedure of the corresponding numbering agencies. In case no exchange of share certificates is arranged, the issuer is also required to update the corresponding numbering agency with the relevant information relating to the proposed corporate action (e.g. change of company name and change in board lot size).

3. Rights issue

3.1 Basic concept: A rights issue is the offer of new shares in the form of nil paid rights (“NPR”) to existing shareholders in proportion to their existing holdings at a specified price. It is a multi-stage corporate action which involves distribution of NPR to registered shareholders, trading of NPR on the Exchange as temporary securities, acceptance of rights shares and trading of fully-paid rights shares in the secondary market. At different stages of the event, there are various issues for issuers’ attention.

3.2 Book closure/Record date: Issuers must publish a notice of the closure of its transfer books or register of members at least six business days (i.e. five clear business days) before the closure for a rights issue or 10 business days before the closure in other cases. The issuer must provide at least two trading days (as defined in the Rules of the Exchange) for trading in the securities with entitlements (i.e. before the ex-date) after publication of the book closure. If cum-rights trading is interrupted due to, for example, a typhoon, “extreme conditions” caused by super typhoons (“Extreme Conditions”)³ and/or a black rainstorm warning or trading suspension of the issuer’s securities, and interruption causes the number of uninterrupted trading days for cum-rights trading to fall short of two, the book closure date will be postponed, where necessary, to provide the market with a minimum of two trading days (during neither of which trading is interrupted) for cum-rights trading during the extended notice period. In these circumstances, the issuer must publish an announcement on the revised timetable as soon as practicable. For the sake of clarity, the two uninterrupted trading days do not need to be consecutive.

An issuer must ensure that the last day for trading in the securities with entitlements to the rights issue falls at least one business day after the general meeting, if the rights issue requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting. Under the current T+2 settlement system, the record date (when there is no book closure) or the last registration date (when there is a book closure) must be at least three business days after the general meeting.

If the issuer fails to publish the result of the poll conducted in the general meeting in the manner prescribed under MB Listing Rule 13.39(5) / GEM Listing Rule 17.47(5), it must ensure there is at least one trading day for trading in the securities with entitlements to the rights issue after publication of the results of the poll. The issuer must publish an announcement on any revised timetable.

3.3 Offer period: The Listing Rules require that the offer period in which the rights shares may be accepted should not be less than 10 business days. In cases

*MB Rule 7.20,
GEM Rule*

³ According to the revised “Code of Practice in Times of Typhoons and Rainstorms” issued by the Labour Department in June 2019, the Government of the Hong Kong Special Administrative Region may issue an announcement on “extreme conditions” in the event of, for example, serious disruption of public transport services, extensive flooding, major landslides or large-scale power outage after super typhoons. When “extreme conditions” are in force (i.e. the two-hour period after cancellation of Typhoon Warning Signal No. 8), the Government will review the situation and further advise the public by the end of the two-hour period whether “extreme conditions” will be extended or cancelled.

where the issuer has a large number of overseas shareholders, a longer period may be desirable, but the Exchange must be consulted if the offer period is over 15 business days. The offer period commences from the next business day after the despatch of the provisional allotment letters (“PAL”).

- 3.4 The latest time for acceptance of and payment for rights shares: To allow sufficient time for clearing and settlement, the latest time for acceptance of and payment for rights share and application for excess rights shares should be three business days after the last trading day of NPR. However if one of the three business days immediately after the last trading day is Christmas Eve, New Year’s Eve or Lunar New Year’s Eve (which are not regarded as settlement days), the issuer should consult the Exchange to agree on a workable timetable.
- 3.5 Rights of overseas shareholders: For the sake of clarity, the issuer should state clearly in the announcement and/or circular whether the offer will be extended to overseas shareholders and if not, the arrangement of the NPR.
- 3.6 Convertible securities: If the issuer has outstanding equity warrants or other convertible securities listed on the Exchange at the time of the rights issue, to protect the interests of the convertible securities holders, the issuer should state in the announcement and circular the name and stock code of these convertible securities and the latest time for the holders of these securities to exercise their rights in order to be entitled to the rights issue.
- 3.7 CA Information to be provided: It is good practice for issuers to provide the following CA information as far as possible in the initial disclosure material of the rights issue:
- Record date** (i.e. *dd/mm/yyyy*) on which the shareholders entitled to the rights issue will be identified based on the names appearing on the books at the end of that date. If the rights issue requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting, the record date on which the issuer will identify shareholders who will be entitled to attend and vote at the general meeting must also be provided.⁴ If there is a book closure period, the record date can fall on any day during the period but it normally falls on the last book closure date. The issuer usually determines the identity of shareholders who qualify for the rights issue at the close of the business day. Otherwise, the issuer must specify the Hong Kong time at which the snapshot of shareholder records will be taken in the form of “*hh:mm* on *dd/mm/yyyy*”.
 - Book closure period** (i.e. either “*on dd/mm/yyyy*” or “*from dd/mm/yyyy to dd/mm/yyyy, both days inclusive*”) in which the company register will be closed to identify shareholders who will be entitled to the rights issue.
 - Latest time for lodging transfers of shares** (i.e. at 4:30pm on *dd/mm/yyyy*) in order to qualify for the rights issue. The issuer must ensure that the selected date is a future business day on which the share registrar will be open for business and will handle share transfers for the relevant security. In particular, if the issuer has a large number of shareholders, it is wise to ensure that the share registrar has the ability to handle the possible

⁴ Issuer should refer to Guide on General Meeting for details.

- substantial volume of share transfers within the book closure period.
- iv. **Rights issue ratio** (e.g. one rights share for every five shares held)
 - v. **Issue size of rights issue** (i.e. number of rights shares to be issued)
 - vi. **Subscription price per rights share** (It is advised to be expressed in Hong Kong dollars or at least with an equivalent Hong Kong dollar amount for easy reference)
 - vii. **The despatch date of Rights Issue Documents** (including prospectus, provisional allotment letter and excess application form, if any) (please specify in the form of either “on dd/mm/yyyy” or “on or before dd/mm/yyyy”)
 - viii. **The despatch date of the fully-paid rights shares** (please specify in the form of either “on dd/mm/yyyy” or “on or before dd/mm/yyyy”)
- 3.8 ISIN code and stock code: If there is a new security resulting from the corporate action, it is best practice for the issuer to announce the ISIN code and stock code of the new security to the market as soon as possible and not later than the payment date for the event.
- 3.9 Basis of allocation of excess shares: To ensure that sufficient information is provided to shareholders, the issuer is required to disclose the basis of allocation of excess shares not subscribed by allottees in the announcement, circular and listing documents for a rights issue. *MB Rule 7.21(1) and (3) / GEM Rule 10.31(1) and (3)*
- 3.10 Treatment of fractions: For the avoidance of doubt, the issuer should include conditions applying to the treatment of fractions in the calculation of resultant entitlements. This is because some ratios of rights issue may result in the creation of fractional entitlements; i.e. resultant entitlements that are not whole units of the underlying shares. For instance, assuming a rights issue ratio of two nil paid rights shares for every five shares held, it will be unclear whether a shareholder holding 1,004 shares (which is not an integral multiple of five shares) will receive 400 nil paid rights shares (on the basis of the whole multiple) or 401 nil paid rights shares (on a pro-rata basis). In such cases, the issuer should specify the conditions.
- 3.11 Free splitting of PALs: The issuer must provide its shareholders with a free splitting service for PALs. The splitting of PALs must be completed within three business days after the date of receipt. The issuer should also note that: *MB Rule Appendix 2A, 4 (2), GEM Rule Appendix 2A, 4 (2)*
- i. the last day for splitting must be at least three business days before the last trading day of NPR; and
 - ii. there must not be more than five clear business days between the last day for splitting and the last day for renunciation (i.e. the latest time for acceptance of and payment for rights shares and application for excess rights shares).
- 3.12 Trading of NPRs: The NPRs distributed to shareholders will be traded on the stock exchange for a short period of time. To facilitate the trading of these temporary securities, the issuer should note the following:
- i. Trading currency of NPRs should be the same as for the underlying securities;

- ii. Board lot size of NPRs should be the same as the existing board lot size for the underlying securities. If there is a proposal for a change in board lot size, the board lot size of NPRs should be the same as the proposed new board lot size for the underlying securities;
 - iii. Trading of NPRs normally commences two business days after the despatch of NPRs to registered shareholders; and
 - iv. Trading period of NPRs should not be less than five business days.
- 3.13 Other corporate actions: If the issuer pursues other corporate actions in the same period (e.g. stock consolidation or sub-division), the issuer should clearly state the rights issue ratio on a post-event basis and the par value (if applicable) of the resultant shares in the circular and rights issue prospectus. In case the other corporate actions are terminated, the issuer should disclose to the market whether or not the rights issue will proceed and if so, whether the rights issue ratio will remain the same.
- 3.14 Typhoon, Extreme Conditions or black rainstorm arrangements: If trading is interrupted by a typhoon, Extreme Conditions and/or a black rainstorm warning and the interruption causes the number of uninterrupted trading days for cum-rights trading during the book closure notice period to fall short of two, the book closure date will be automatically postponed, where necessary, to provide at least two trading days for trading cum-rights securities. In addition, an issuer must ensure that the last day for trading in the securities with entitlements to a rights issue falls at least one business day after the general meeting, if the rights issue requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting (see **G3.2**). If trading on the Exchange is interrupted due to a typhoon, Extreme Conditions and/or a black rainstorm warning, the record date/book-close date (thus the ex-date) may need to be postponed. In these circumstances, the issuer must publish an announcement on the revised timetable as soon as practicable.

Whenever the schedule of rights issue may be interrupted by a typhoon, Extreme Conditions or a black rainstorm warning, shareholders should be properly informed of the contingency arrangements for these circumstances. The issuer must insert the following note, or a similar note to the same effect, to the timetable set out in the circular and the listing document for a rights issue:

“The latest time for acceptance of and payment for rights shares will not take place if a tropical cyclone warning signal no. 8 or above, or “extreme conditions” caused by super typhoons⁵ or a ‘black’ rainstorm warning is:

- i. in force in Hong Kong at any local time before 12:00 noon and no longer in force after 12:00 noon on [Last Acceptance Date]. Instead the latest time for acceptance of and payment for the rights shares will be extended to 5:00 p.m. on the same business day;*
- ii. in force in Hong Kong at any local time between 12:00 noon and 4:00 p.m. on [Last Acceptance Date]. Instead the latest time of acceptance of and payment for the rights shares will be rescheduled to 4:00 p.m. on the following business day which does not have either of those warnings in force at any time between 9:00 a.m. and 4:00 p.m.*

⁵ See footnote 3

If the latest time for acceptance of and payment for the rights shares does not take place on [Last Acceptance Date], the dates mentioned in the 'Expected timetable' section may be affected. The Company will notify shareholders by way of announcements on any change to the expected timetable as soon as practicable."

- 3.15 CCASS eligibility: If the rights shares in their nil-paid and fully-paid forms will be admitted as CCASS eligible securities from the date of commencement of dealings, the circular and the listing document of the rights issue should contain the following paragraph or a similar paragraph to the same effect:

"Subject to the granting of listing of, and permission to deal in, the right shares in both nil-paid and fully-paid forms on the Stock Exchange, the rights shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the commencement date of dealings in the rights shares on the Stock Exchange or such other date as determined by HKSCC. Settlement of transactions between participants of the Stock Exchange on any trading day is required to take place in CCASS on the second settlement day thereafter. All activities under CCASS are subject to the General Rules of CCASS and CCASS Operational Procedures in effect from time to time."

- 3.16 Excess application arrangement: It is common for issuers to arrange for disposal of unsubscribed rights shares by means of excess application forms. In making excess application arrangements, issuers should note the following matters in relation to shareholdings under nominee companies.

- i. *Top-up arrangement*: In allocating excess rights, the issuer usually gives preference to applications with less than one board lot by rounding it up to a whole board lot ("Top-up Arrangement") and treats shareholders whose names appear on the register of members ("Qualifying Shareholders") as single shareholders. As such, a nominee company whose name appears on the register of members will be treated as a single shareholder ("Registered Nominee Company") and the Top-up Arrangement will not be extended to the beneficial owners who hold their shares through that nominee company. It is important for issuers to draw the attention of shareholders to these facts. Accordingly, issuers should put the following statements or statements to the same effect into the proposed rights issue announcement, circular and listing document:

"The Board of the issuer will regard a Registered Nominee Company as a single shareholder under the Top-up Arrangement. Accordingly, the Top-up Arrangement in relation to the allocation of excess rights will not be extended to the beneficial owners individually. Beneficial owners who hold their shares through a Registered Nominee Company are advised to consider whether they would like to arrange registration of their shares in their own names prior to the relevant book close period."

- ii. *Application tier arrangement:* The issuer may set application tiers to govern the number of excess rights shares that can be applied for in each excess application. However there are practical difficulties (described below) preventing nominee companies from complying with such requirement.

A Registered Nominee Company only has the shareholding information of its direct clients. It has limited information on the identity and shareholding information of beneficial owners who are the customers of its direct clients. Its direct client has full discretion to determine how the excess applications from its own customers are submitted to the Registered Nominee Company. The direct client may (a) aggregate all the excess applications of its clients and submit only one excess application to the Registered Nominee Company; or (b) submit several excess applications to the Registered Nominee Company with some excess applications representing the aggregate of excess applications of several clients and some excess applications representing the individual excess application of each client. As such, it is the responsibility of the direct client or its own customers to ensure compliance with the application tier requirement and the Registered Nominee Company is not in a position to do so; and

Even if all beneficial owners who hold shares through a Registered Nominee Company comply with the application tier requirement, it is still possible that the aggregate number of excess rights applied for by a Registered Nominee Company may not fall into any application tiers.

Accordingly, it is best practice for issuers to insert into the proposed rights issue announcement, circular and listing document (where applicable) a paragraph to the effect that Registered Nominee Companies would be exempted from the application tier requirement and that it is the responsibility of each beneficial owner who holds securities through a Registered Nominee Company to comply with the application tier requirement. The issuer should also state clearly in the announcement, circular and listing document that excess applications from nominee companies will be accepted by share registrars even if their subscription under PAL is not in full.

- 3.17 Undertaking / declaration: Given that nominee companies may only have the shareholding information of their direct clients and have limited information on the identity and shareholding information of the ultimate beneficial owners, the issuer should note that nominee companies are not in a position to give any undertaking / declaration or deemed representation / warranty (e.g. when making the subscription under PAL or application for excess rights, nominee companies are deemed to have given representation or warranty to the issuer that the beneficial owners are not (a) within the United States; or (b) persons by whom the subscription / application would require additional registrations or require the issuer to comply with any requirements or procedures under any laws or regulations of any jurisdictions outside Hong Kong) at the time of making the subscription under PAL or application for excess rights.

- 3.18 Sample timetable for a rights issue: The following table is compiled strictly as a sample for issuers' reference. It contains various assumptions which may not apply to a specific case of a rights issue. Depending on the individual requirements of each exercise, the issuer should make necessary modifications.

4. Open offer

- 4.1 Basic concept: An open offer is an offer of securities to existing shareholders. Therefore many guidelines for a rights issue also apply to an open offer. However in an open offer, the offer of securities for subscription may or may not be in proportion to the existing holding of shareholders and the securities are not allotted on renounceable documents. Therefore the timetables are relatively simpler than for a rights issue.

- 4.2 Book closure/Record date: An issuer must publish a notice of the closure of its transfer books or register of members at least 10 business days before the closure.

*MB Rule
13.66(1),
13.66(2),
Note(3) to
13.66*

An issuer must ensure that the last day for trading in the securities with entitlements to the open offer falls at least one business day after the general meeting, if the open offer requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting. Under the current T+2 settlement system, the record date (when there is no book closure) or the last registration date (when there is a book closure) must be at least three business days after the general meeting.

*GEM Rule
17.78(1),
17.78(2),
Note(2) to
17.78*

If the issuer fails to publish the result of the poll conducted in the general meeting in the manner prescribed under MB Listing Rule 13.39(5) / GEM Listing Rule 17.47(5), it must ensure there is at least one trading day for trading in the securities with entitlements to the open offer after publication of the results of the poll. The issuer must publish an announcement on any revised timetable.

- 4.3 Offer period: The Listing Rules require that the offer of securities by way of an open offer must remain open for acceptance for a minimum period of 10 business days. In cases where the issuer has a large number of overseas shareholders, a longer period may be desirable, but the Exchange must be consulted if the offer period is over 15 business days. The offer period commences from the next business day after the despatch of subscription forms.

*MB Rule 7.25,
GEM Rule
10.40*

- 4.4 Rights of overseas shareholders: For the sake of clarity, the issuer should state clearly in the announcement and circular whether the open offer will be extended to overseas shareholders and if not, the arrangement for the unsubscribed offer shares.

- 4.5 Convertible securities: If the issuer has outstanding equity warrants or other convertible securities listed on the Exchange at the time of an open offer, to protect the interests of the convertible securities holders, the issuer should state in the announcement and circular the name and stock code of the convertible securities and the latest time for the holders of these securities to exercise their rights in order to be entitled to the open offer.

- 4.6 CA information to be provided: It is good practice for issuers to provide as far as possible the following information in the initial announcement of the

open offer:

- i. **Record date** (i.e. dd/mm/yyyy) on which the shareholders entitled to the offer shares will be identified based on the names appearing on the books at the end of that date. If the open offer requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting, the record date on which the issuer will identify shareholders who will be entitled to attend and vote at the general meeting must also be provided.⁶ If there is a book closure period, the record date can fall on any day during the period but it normally falls on the last book closure date. The issuer usually determines the identity of qualified shareholders at the close of the business day. If otherwise, the issuer must specify the Hong Kong time at which the snapshot of shareholder records will be taken in the form of “hh:mm on dd/mm/yyyy”.
 - ii. **Book closure period** (i.e. either “on dd/mm/yyyy” or “from dd/mm/yyyy to dd/mm/yyyy, both days inclusive”) in which the company register will be closed to identify the shareholders who will be entitled to the open offer.
 - iii. **Latest time for lodging transfers of shares** (i.e. by 4:30pm on dd/mm/yyyy) in order to qualify for the open offer. The issuer should ensure that the selected date is a future business day on which the share registrar will be open for business and will handle transfers of shares for the relevant securities. In particular, if the issuer has a large number of shareholders, it is wise to ensure that the share registrar has the ability to handle the possible substantial volume of share transfers within the book closure period.
 - iv. **Open offer ratio** (e.g. one offer share for every five shares held)
 - v. **Issue size of open offer** (i.e. number of offer shares to be issued)
 - vi. **Subscription price per offer share** (It is advised to be expressed in Hong Kong dollars or at least with an equivalent Hong Kong dollar amount for easy reference)
 - vii. **The despatch date of the subscription forms and the offer document** (please specify in the form of either “on dd/mm/yyyy” or “on or before dd/mm/yyyy”)
 - viii. **The despatch date of the offer shares** (please specify in the form of either “on dd/mm/yyyy” or “on or before dd/mm/yyyy”)
- 4.7 **Basis of allocation of excess shares:** To ensure that sufficient information is provided to shareholders, the issuer must disclose the basis of the allocation of securities not validly applied for by shareholders in the announcement, circular and listing documents for an open offer.
- 4.8 **Treatment of fractions:** For the avoidance of doubt, the issuer should include conditions applying to the treatment of fractions in the calculation of resultant entitlements. This is because some ratios of an open offer may result in the creation of fractional entitlements; i.e. resultant entitlements that

(3)*

⁶ Issuer should refer to Guide on General Meeting for details.

are not whole units of the underlying shares. For instance, for an open offer ratio of two offer shares for every five shares held, it will be unclear whether a shareholder holding 1,004 shares (which is not an integral multiple of five shares) will receive 400 offer shares (on the basis of the whole multiple) or 401 offer shares (on a pro-rata basis). In these cases, the issuer should specify the conditions.

- 4.9 Other corporate actions: If the issuer pursues other corporate actions during the same period (e.g. stock consolidation or sub-division), it should clearly state the open offer ratio on a post-event basis and the par value (if applicable) of the resultant shares in its circular. In cases where the other corporate actions are terminated, the issuer should disclose to the market whether or not the open offer will proceed and if so, whether the open offer ratio will remain the same.
- 4.10 Typhoon, Extreme Conditions or black rainstorm arrangements: The schedule of an open offer may be interrupted by typhoons, Extreme Conditions or black rainstorms. Shareholders should be properly informed of the contingency arrangements in these circumstances. The issuer must insert the following note, or a similar note to the same effect, to the timetable set out in the circular or the listing document of the open offer:

“The latest time for acceptance of and payment for offer shares will not take place if a tropical cyclone warning signal no. 8 or above, or “extreme conditions” caused by super typhoons⁷ or a ‘black’ rainstorm warning is:

- i. in force in Hong Kong at any local time before 12:00 noon and no longer in force after 12:00 noon on [Last Acceptance Date]. Instead the latest time for acceptance of and payment for the offer shares will be extended to 5:00 p.m. on the same business day;*
- ii. in force in Hong Kong at any local time between 12:00 noon and 4:00 p.m. on [Last Acceptance Date]. Instead the latest time of acceptance of and payment for the offer shares will be rescheduled to 4:00 p.m. on the following business day which does not have either of those warnings in force at any time between 9:00 a.m. and 4:00 p.m.*

If the latest time for acceptance of and payment for the offer shares does not take place on [Last Acceptance Date], the dates mentioned in the ‘Expected timetable’ section may be affected. The Company will notify shareholders by way of announcements on any change to the expected timetable as soon as practicable.”

In addition, an issuer must ensure that the last day for trading in the securities with entitlements to the open offer falls at least one business day after the general meeting, if the open offer requires approval by shareholders in general meeting or is contingent on a transaction that is subject to approval by shareholders in general meeting. If trading on the Exchange is interrupted due to a typhoon, Extreme Conditions and/or a black rainstorm warning, the record date/book-close date (thus the ex-date) may need to be postponed. In such circumstance, the issuer must publish an announcement on the revised timetable as soon as practicable.

⁷ See footnote 3

- 4.11 CCASS eligibility: If the offer shares will be admitted as CCASS eligible securities from the date of commencement of dealings, the timetable set out in the circular and the listing document of the open offer should contain the following paragraph or a similar paragraph to the same effect:

“Subject to the granting of listing of, and permission to deal in, the offer shares on the Stock Exchange, the offer shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the commencement date of dealings in the offer shares on the Stock Exchange or such other date as determined by HKSCC. Settlement of transactions between participants of the Stock Exchange on any trading day is required to take place in CCASS on the second settlement day thereafter. All activities under CCASS are subject to the General Rules of CCASS and CCASS Operational Procedures in effect from time to time.”

- 4.12 Excess application arrangement: Issuers may arrange for disposal of securities not validly applied for by shareholders under their assured entitlement, in which case such securities will be available for subscription by all shareholders in excess of their assured allotments. In cases where an excess application arrangement will be made, issuers should note the following matters in relation to shareholdings under nominee companies.

- i. *Top-up arrangement*: In allocating excess offer shares, the issuer usually gives preference to applications with less than one board lot by rounding it up to a whole board lot (“Top-up Arrangement”) and treats shareholders whose names appear on the register of members (“Qualifying Shareholders”) as single shareholders. As such, a nominee company whose name appears on the register of members will be treated as a single shareholder (“Registered Nominee Company”) and the Top-up Arrangement will not be extended to the beneficial owners who hold their shares through that nominee company. It is important for issuers to draw the attention of shareholders to these facts. Accordingly, issuers should put the following statement or a statement to the same effect in the proposed open offer announcement, circular and listing document:

“The Board of the issuer will regard a Registered Nominee Company as a single shareholder under the Top-up Arrangement. Accordingly, the Top-up Arrangement in relation to the allocation of excess offer shares will not be extended to the beneficial owners individually. Beneficial owners who hold their shares through a Registered Nominee Company are advised to consider whether they would like to arrange registration of their shares in their own names prior to the relevant book close period.”

- ii. *Application tier arrangement*: The issuer normally may set application tiers to govern the number of excess offer shares that can be applied for in each excess application. However there are practical difficulties (described below) preventing nominee companies such as HKSCC Nominee Limited from complying with such a requirement.

A Registered Nominee Company only has the shareholding information of its direct clients. It has limited information on the identity and shareholding information of beneficial owners who are the customers of its

direct clients. Its direct client has full discretion to determine how the excess applications from its own customers are submitted to the Registered Nominee Company. The direct client may: (a) aggregate all the excess applications of its clients and submit only one excess application to the Registered Nominee Company; or (b) submit several excess applications to the Registered Nominee Company with some excess applications representing the aggregate of excess applications of several clients and some excess applications representing the individual excess application of each client. As such, it is the responsibility of the direct client or its own customers to ensure compliance with the application tier requirement and the Registered Nominee Company is not in a position to do so; and

Even if all beneficial owners who hold securities through a Registered Nominee Company comply with the application tier requirement, it is still possible that the aggregate number of excess offer shares applied for by a Registered Nominee Company may not fall into any application tiers.

Accordingly, it is good practice for the issuer to insert in the proposed open offer announcement, circular and listing document (where applicable) a paragraph to the effect that Registered Nominee Companies would be exempted from the application tier requirement and that it is the responsibility of each beneficial owner who holds securities through a Registered Nominee Company to comply with the application tier requirement. The issuer should state clearly in the announcement, circular and listing document that excess application from nominee companies will be accepted by share registrars even if their assured entitlement of the offer shares are not subscribed in full.

- 4.13 Undertaking / declaration: Given that nominee companies may only have the shareholding information of their direct clients and have limited information on the identity and shareholding information of the ultimate beneficial owners, the issuer should note that nominees companies are not in a position to give any undertaking / declaration or deemed representation / warranty (e.g. when making a subscription for assured entitlement or application for excess offer shares, nominee companies are deemed to have given a representation or warranty to the issuer that the beneficial owners are not (a) within the United States; or (b) persons by whom the subscription / application would require additional registrations or require the issuer to comply with any requirements or procedures under any laws or regulations of any jurisdictions outside Hong Kong) at the time of making the subscription of assured entitlement or application for excess offer shares.

- 4.14 Sample timetable for an open offer: The following table is compiled strictly as a sample for issuers' reference. It contains various assumptions which may not apply to a specific case of an open offer. Depending on the individual requirements of each exercise, the issuer should make necessary modifications.

5. Share consolidation / subdivision⁸

- 5.1 Basic concept: Occasionally an issuer may restructure its issued share capital by changing the quantity of shares issued and/or the par value (if applicable) of shares, including through:
- A **share split**, which is an increase in the issuer's number of issued shares by dividing its existing shares proportionally into multiple subdivided shares. It will result in the proportionate reduction of the market price per sub-divided share.
 - A **share consolidation**, which is a decrease in the issuer's number of issued shares by merging its existing shares proportionally into new consolidated shares. It will result in the proportionate increase of the market price per consolidated share.
- 5.2 Effective date: The issuer should specify the effective date of the share consolidation / subdivision and the commencement date of trading of consolidated or subdivided shares in its announcement or circular, and highlight this information in the respective timetable. In general, the corporate action should become effective as soon as all conditions become unconditional. However, to allow sufficient time for market intermediaries (i.e. stockbrokers and custodian banks) to make appropriate adjustments to their internal systems, the Effective Date should be one clear business day after the general meeting in relation to the proposal for share consolidation or subdivision. For the avoidance of doubt, the effective date should be expressed in Hong Kong time.
- 5.3 Announcement of meeting results: The issuer should announce the results of the general meeting in relation to the proposal for share consolidation or subdivision as soon as possible, but in any event at least 30 minutes before the earlier of either the commencement of the morning trading session or any pre-opening session on the business day after the meeting.
- 5.4 Share price after consolidation / subdivision: Issuers should observe Rules 13.64 and 13.64A of the Listing Rules / Rules 17.76 and 17.76A of the GEM Listing Rules when setting details of their share consolidation / subdivision: (i) Rule 13.64 / GEM Rule 17.76 states that the Exchange reserves the right to require an issuer to either change its trading method or to proceed with a consolidation of its securities where the market price of the securities approaches the extremities of HK\$0.01, which the Exchange considers to be any trading price less than HK\$0.10; (ii) Rule 13.64A / GEM Rule 17.76A provides that issuers must not undertake a subdivision if its adjusted share price after subdivision is less than HK\$1 based on the lowest daily closing price of the shares during the six-month period before the subdivision.
- 5.5 New board lot size: In determining the new board lot size for the consolidated / subdivided shares, the issuer should note the following:
- The issuer should select a new board lot size which will minimise the creation of odd lots;

*Listing
Rules, MB

⁸ Also applicable to warrant splits or consolidations

- ii. The new board lot should be an integral multiple of the original board lot size for an increase in board lot size; or an integral divisor for a decrease in board lot size;
 - iii. The new board lot must be less than 900,000 shares; and
 - iv. Taking into account the minimum transaction costs for a securities trade, the expected board lot value should be greater than HK\$2,000.
- 5.6 Free exchange of certificates: The period of the free exchange of share certificates should be clearly stated in the disclosure material. The free exchange period generally lasts for five weeks, starting from the effective date and ending at least two business days after the last day of parallel trading. For clarity, the latest time for submission of share certificates for free exchange as well as the name and address of share registrars should be provided.
- 5.7 New share certificates: To avoid confusion in physical settlement, it is advised that new share certificates should be different from old share certificates as far as possible in terms of design and colour. The colour of the old and new certificates should be clearly stated in the disclosure material. The new share certificates should be made available on or before the first day of parallel trading.
- 5.8 Old share certificates: Issuer circulars on the share consolidation or subdivision must clearly state the following:
- i. Existing share certificates will continue to remain good evidence of legal title; and
 - ii. Whether or not the old share certificates are still valid for trading; and if not, the date from which the old share certificates will cease to be valid for delivery, trading and settlement purposes.
- 5.9 Parallel trading: During the period of free exchange of share certificates, the Exchange will set up a parallel trading arrangement to facilitate trading of the respective securities in the form of existing and new share certificates. The parallel trading period normally lasts for at least three weeks. A typical parallel trading arrangement involves three stages:
- i. Stage 1: On the effective date of the share consolidation or subdivision, a temporary trading counter is set up for trading of the consolidated/subdivided shares in the form of old share certificates in a temporary board lot size (see G5.10). The original trading counter is temporarily closed.
 - ii. Stage 2: After 10 business days, the original trading counter is reopened for trading of the consolidated/subdivided shares in the form of new share certificates in the new board lot size. Parallel trading is conducted simultaneously in the original counter (new stock certificates) and in the temporary counter (old share certificates).
 - iii. Stage 3: After three weeks, the parallel trading comes to an end and the temporary trading counter is closed. Trading of consolidated/subdivided shares in new share certificates in the new board lot size will be effected in the original counter only. The old share certificates will, if applicable, cease to be valid for delivery, trading and settlement purposes but will remain effective as document of title.

- 5.10 Board lot size in temporary trading counter: To ensure one board lot in the temporary counter is equivalent to one board lot before the consolidation / subdivision, the board lot size in the temporary counter should be set according to the following formula:

$$\text{Temporary Board Lot Size} = \frac{\text{Existing board lot size}}{\text{Basis of consolidation/subdivision}}$$

For example, a 2-into-1 share consolidation

Existing board lot size = 2,000 old shares; New board lot size = 4,000 new shares

Temporary board lot size = 2,000 old shares divided by 2 (i.e. basis of consolidation as determined by the issuer) = 1,000 new shares

	Original trading counter (board lot 2,000)	Temporary trading counter (board lot 1,000)
Effective date	Temporarily closed	Opened for trading of old share certificates, in the temporary board lot size
↕ At least 10 business days		
First day of parallel trading	Trading of new certificates in new board lot of 4,000	Trading of old share certificates, in the temporary board lot size
↕ At least three weeks		
After last day of parallel trading	Continue trading of new certificates in new board lot of 4,000	Closure of temporary trading counter

- 5.11 Temporary trading counter: The temporary trading counter should be established at least 10 business days before the start of parallel trading (i.e. which is the time required for the standard share registration service in respect of the exchange of share certificates). Otherwise, the issuer is required to make a statement in the relevant announcement/circular listing document to guarantee that new certificates will be available on or before the first day of parallel trading if shareholders lodge their old certificates on the effective date.

- 5.12 Odd lot arrangement: The Listing Rules require the issuer make appropriate arrangements to enable odd lot holders either to dispose of their odd lots or to round them up to a board lot (“Odd lot arrangement”).

*MB Rule
13.65 /
GEM Rule
17.77*

During the parallel period, the issuer is required to appoint a broker as its agent to match the sales and purchases of odd lots or for the major shareholder itself or through its agent to stand in to buy or sell odd lot securities. The particular circumstances of an issuer may dictate the method by which odd lot holders are to be accommodated. If necessary, issuers can consult the Exchange on their preferred odd lot programme.

- 5.13 CCASS eligibility The issuer should include in the circular the following paragraph or a similar paragraph to the same effect:

“Subject to the granting of listing of, and permission to deal in, the securities on the Stock Exchange, the securities will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the commencement date of dealings in the consolidated / subdivided securities on the Stock Exchange or such other date as determined by HKSCC. Settlement of transactions between participants of the Stock Exchange on any trading day is required to take place in CCASS on the second settlement day thereafter. All activities under CCASS are subject to the General Rules of CCASS and CCASS Operational Procedures in effect from time to time.”

- 5.14 Sample timetable for share consolidation / subdivision: The following table is compiled strictly as a sample for issuers' reference. It contains various assumptions which may not apply to the specific case of a particular share consolidation / subdivision. Depending on the individual requirement of each exercise, the issuer should make modifications thereto.

6. Change in board lot size

- 6.1 Basic concept: A board lot is the standard number of shares / units that constitutes one lot for trading in a particular security. Orders placed to the Exchange's cash market trading system for auto-matching must be a board lot or a multiple of a board lot. In Hong Kong, there is no standard board lot size for listed securities. However, a majority of issuers adopt the board lot size of 1,000 shares or its multiple, with nearly half having 2,000 shares as a board lot. Sometimes, an issuer may change the board lot size to improve the trading liquidity of its securities.
- 6.2 Effective date: To allow sufficient time for shareholders to make appropriate adjustments to their shareholding, the effective date of the new board lot size should be at least 15 business days after the publication of the respective issuer announcement. The timeframe must be clearly spelt out in the announcement or circular and highlighted in the timetable.
- 6.3 New board lot size: In determining the new board lot size, the issuer should note the following:
- The issuer should select a new board lot size which will minimise the creation of odd lots;
 - The new board lot should be an integral multiple of the original board lot size for an increase in board lot size; or an integral divisor for a decrease in board lot size;
 - The new board lot must be less than 900,000 shares; and
 - Taking into account the basic transaction costs for a securities trade, the new board lot value should be greater than HK\$2,000.
- 6.4 Odd lot arrangement: The Listing Rules require the issuer, in the case of a change in board lot size, to make appropriate arrangements to enable odd lot holders either to dispose of their odd lots or to round them up to a board lot. The issuer may appoint a broker as its agent to match the sales and purchases of odd lots or for the major shareholder itself or through its agent to stand in to buy or sell odd lot securities. The particular circumstances of an issuer may dictate the method by which odd lot holders are to be accommodated. Issuers are urged to consult the Exchange at the earliest opportunity to agree on the appropriate odd lot programme. The odd lot arrangement is offered during the parallel trading period. Irrespective of the existence of parallel trading, the odd lot arrangement should last for at least three weeks.
- 6.5 Free exchange of stock certificates: The issuer needs to decide whether or not to issue new stock certificates (see **G6.8**). If new share certificates are to be issued, there should be free exchange of share certificates provided to shareholders. The free exchange period should commence 10 business days before the effective date and cease at least two business days after the end of parallel trading. If there is no parallel trading, the free exchange period should last at least one month. The free exchange period should be clearly stated in the issuer's announcement or circular. For clarity, the latest time for submission of share certificates for free exchange as well as the name and address of share registrars should be provided.
- 6.6 New share certificates: The issuer circular should indicate the colour of the new and old share certificates (which can be the same).

- 6.7 Old stock certificates: The issuer should indicate in the respective announcement and circular that the old share certificates will
- i. remain good evidence of legal title; and
 - ii. continue to be valid for delivery, trading and settlement purposes in the case of a change in board lot size.
- 6.8 Parallel trading: a change of board lot size may or may not require parallel trading, subject to the need for new share certificates. The duration of parallel trading usually lasts at least three weeks.

Situation	Exchange of certificates required?	Parallel trading required?	Reason
Increase by a small integral multiple of existing board lot	Optional	No	Old stock certificates can be stapled together for trading
Increase by a large integral multiple of existing board lot	Optional	Optional	Could be too inconvenient to deliver piles of stock certificates during settlement
Increase by a non-integral multiple of existing board lot	Mandatory	Yes	To eliminate odd lots
Decrease of existing board lot	Mandatory	Yes	To avoid trading in special lots

- 6.9 Sample timetable for change in board lot size: The following table is compiled strictly as a sample for issuers' reference. It contains various assumptions (e.g. parallel trading) which may not apply to a specific case of a change in board lot size. Depending on the individual requirements of each exercise, the issuer should make necessary modifications.

Event	Remarks	Timeline*
Publication of the announcement		Day 1
First day of free exchange of share certificates	Commences 10 business days before the effective date and lasts for one month	Day 6
Last day for trading of the shares with old board lot size in the original counter	The business day before effective date	Day 15

7. Change of company name / addition of Chinese name

- 7.1 Basic concept: Occasionally an issuer may change its name. In most cases, this is due to a change in the business scope of the issuer, such as expansion into a new business or service areas, or the completion of a significant transaction, a corporate takeover or merger. In addition, an issuer with only an English name may opt to add a Chinese name. In these cases, the issuer needs to solicit the approval of shareholders as governed by the issuer's Memorandum (where applicable) and/or Articles of Association (or equivalent constitutional document) and file the new name with the respective company registry in its place of incorporation.
- 7.2 Supporting materials: When notifying the Exchange of the change of its corporate name / addition of a Chinese name, the issuer should provide the Certificate of Change of Name issued by the Company Registry in the place of incorporation. If the issuer is an overseas incorporated company, it should provide the following supporting materials:
- i. the Certificate of Registration of Change of Corporate Name of non-Hong Kong Company issued by the Company Registry in Hong Kong, if applicable; and
 - ii. a legal opinion allowing the use of the Chinese name in the place of incorporation, if the Chinese name has not been registered there.
- 7.3 New stock short name: The Exchange will normally notify or confirm with the issuer the changes to trading arrangements, including the new stock short name within three business days after the receipt of the required supporting materials for adoption of the new company name. It is good practice for the issuer to announce the short stock short name to the market as soon as practicable.
- 7.4 Free exchange of certificates: The issuer should indicate whether or not there will be any arrangement for the free exchange of the old share certificates for new share certificates bearing the new corporate name (if applicable). If there will be a free exchange service, the issuer should indicate the following information in its announcement:
- i. the period for free exchange of certificates (which usually more than a month);
 - ii. the colour of new and old share certificates; and
 - iii. the name and address of share registrars.
- 7.5 Old share certificates: The issuer should clearly inform shareholders in the respective announcement or circular that the old share certificate will continue to remain good evidence of legal title. Subject to the decision of the issuer, the existing share certificates bearing the old corporate name may or may not become invalid for delivery, trading and settlement purposes. If it is decided that the old share certificates will not be valid for such purposes, the issuer should clearly state the fact in its announcement and provide the date from which the old share certificates will cease to be valid for such purposes.

7.6 Checklist for technical and operational matters in relation to a change of company name / addition of Chinese name

The issuer is expected to provide affirmative answers to all the questions in the checklist.
