3 Guidelines for OTP-CSC MRs

CCEPs are requested to make note of the following important points when they take part in the MR2:

Before MR2:

- [Notification Form for OTP-CSC Market Rehearsal \(MRs\)](#) to provide the designated contact persons and confirm whether they will join the Post Test Verification Session after MRs has been submitted to HKEX before the deadline on 11 June 2019.
- For participation of MR2, no prior registration is required.
- CCEPs should have completed the End-to-End Test to verify the readiness of their BSS software prior to their participation in the MRs.

During MR2:

- CCEPs must ensure that the correct configuration (if needed) of BSS software supporting OTP-CSC is activated before connecting to OTP-CSC. In this case, after conducting MR2, CCEPs must also ensure that BSS software is reinstated for CSC to ensure no interruption to their trading activities on the following trading day.
- CCEPs are reminded to back up their BSS production database before the MR2 so that the database can be restored after the test to safeguard data integrity for the following trading day.
- The stock database as at the market open on **17 June 2019** will be used for MR2.
- Take note of the saleable quantities of eligible stocks on hand when placing sell orders with reference to [Appendix B](#).
- It will simulate OTP-CSC and OMD-CC system failure and failover to backup site at around 9:45am.
- CCEPs should sign on **ALL** CCCG/BSS (including Trading and Drop Copy sessions) by using the assigned Comp ID and password "**Ab123456**" before and after OTP-CSC and OMD-CC system failure and failover to backup site.
- CCEPs are requested to submit orders to simulate real-life trading activities. Submission of buy and sell orders are required to tag with BCANs, however, no BCAN checking will be done during the MR2.
- CCEPs already rolled out pre-trade checking function for institutional investor ID (II ID), please use II ID that opened at or before **3 June 2019**.
- CCEPs supported but not yet rolled out pre-trade checking function for II ID, dummy II IDs will be separately issued to the relevant CCEPs.

After MR2:

- Upon completion of test, CCEPs are reminded to log off and terminate all CCCG sessions, then perform end-of-day procedures and clean up the transaction data (e.g. orders and trades) entered during the test from BSS (if applicable).
- After the testing, CCEPs are also reminded to clean up the next day requests for testing, if any, to ensure that these testing orders will not be carried forward to the production on the following trading day.

- All OMD-CC messages disseminated during the MR2 should be treated as non-production data and have to be cleaned up afterwards.

Post Test Verification Session:

- Participation in Post Test Verification Session is optional and required prior registration.
- Participating CCEPs are required to use **production password** to logon all CCCG/BSS (including Trading and Drop Copy sessions) to verify their BSS systems successfully fallback to current production version.
- Participating CCEPs can only perform logon test as both Shanghai and Shenzhen markets are closed.
