4. Do you agree with the proposed Dynamic GF model at HKSCC?

☒ Yes

☐ No

Please provide reasons for your response and include any other suggestions or comments you may have on this question:

However we have a concern that the Dynamic GF put up by the member will not be considered as liquid capital by the SFC in the calculation of the member Financial Resources Rule (FRR). Currently any margin collateral placed by the member to HKCASS is considered liquid asset under the FRR and change of treatment towards the Dynamic GF collateral will be detrimental to the members liquid capital and will increase the burden of funding member's liquid capital. Both the HKSCC and the SFC should work together to provide a similar liquid asset treatment to any new collateral margining solution proposed to members to ensure there is no additional impact on capital funding.
