---

A1 personal view  
[REDACTED]

None of the above (non-listed company)

A2 I do not wish to disclose my identity to the public

B1 - agree.

I feel that companies have a bigger impact on the he world / environment / society than merely financial, and should report accordingly

B2 - agree

It makes sense to make the periods consistent as both aspects are part f the business. It also allows trends to be made, eg comparing ESG measures vs financial impact.

B3 to B15 - agree

In summary, I would like to see more transparency in company reporting, to record other impacts from the listed companies.

Best Regards,
