Consultation Questions Part B

Please indicate your preference by checking the appropriate boxes. Please reply to the questions below on the proposed changes discussed in the Consultation Paper downloadable website the HKEx from http://www.hkex.com.hk/eng/newsconsul/mktconsul/Documents/cp201112.pdf.

Where there is insufficient space provided for your comments, please attach additional pages.

Should the ESG Guide be a recommended best practice appended to the Listing Rules? 1.

Yes

If your answer is "No", please give reasons and alternative views.

So far as ESG is concerned, I noted that Hong Kong is far lag behind our counterparts in Asia, such as Singapore, Taiwan and PRC. According to KPMG International Survey of Corporate Responsibility Reporting 2011 ("KPMG Report"), statistics show that 43%, 37% and 59% of the companies are reporting on their corporate responsibility in Singapore, Taiwan and PRC respectively. (See page 10 to 11 of KPMG Report).

I was disappointed to see that Hong Kong is not a participant in the survey of KPMG Report (see page 32 of KPMG Report). Although the Consultation Paper on ESG Reporting Guide does not provide any statistics for issuers who are reporting ESG, I believe the number of such issuers must be very small.

I believe the Stock Exchange should be more proactive to encourage issuers to start ESG reporting soonest possible. It seems that voluntary reporting by way of "recommended best practice" may not meet this objective. I suggest that the Stock Exchange should adopt the "comply or explain" approach similar to the Corporate Governance Code contained in Appendix 14 of the Listing Rules.

Do you agree with the proposed Main Board Listing Rule 13.91 and paragraph 53 of 2. Appendix 16/ GEM Listing Rules 17.103 and 18.84 in Appendix I of the Consultation Paper?

Yes

No

If your answer is "No", please give reasons and alternative views.

Subject to my answer to Question 1 above, I agree with this proposal. But please see my drafting comments shown in Appendix 1.

Content of the proposed Environmental, Social and Governance Reporting Guide

Introduction

3. Do you agree with the Introduction section?

The proposed Introduction section states:

- 1. This guide sets out Environmental, Social, and Governance ("ESGI") subject areas, aspects, general disclosure and key performance indicators ("EPISI");
- 2 If his guide is not comprehensive. We encourage an issuer to identify and disclose additional ESG issues and kPIs that are relevant to its business, it may also refer to existing international ESG reporting guidance for its relevant industry or sector.
- Am issuer may adopt a higher level of ESG reporting based on international guidance and standards.
- 4. An issuer may disclose the ESG information in its annual report regarding the same period covered in the annual report, or in a separate report, in print or on its website. Where the information is included in a separate report, an issuer is free to report on any period.
 - It is important to involve the board of directors in preparing the ESG report.

 The board of directors is responsible for ESG reporting but it may delegate
 the task of compiling the ESG report to its employees or a committee that
 reports to the board.

If your answer is "No", please give reasons and alternative views.

Subject to my comments as shown in Appendix 2, I generally agree with the proposed section.

General Approach

4. Do you agree with the guidance under the General Approach section?

The proposed General Approach section states:

Identify subject areas, aspects and indicators that are relevant

- 8. Not all ESG subject areas, aspects and KPIs in this Guide may be relevant to an issuer's business. Also, some may be more important to an issuer's business than others. For example, product responsibility, an ESG aspect, may be important to a retailer.
- 9 The ESG report could prioritise ESG subject areas, aspects and KPIs that are material in the context of its corporate strategy, which could be given a promuence in the report.
- 104 It is unnecessary to report on all subject areas, aspects and KPIs. An issuer could by identify and report on relevant ESG subject areas, aspects and KPIs, that have material environmental and social impacts. Materiality can be addressed in strategic, operational and financial terms.

474454423

Engage stakeholders

- It is important to engage stakeholders to identify material aspects and KPIs and understand their views. Stakeholders are parties that have interests in or are affected by the decisions and activities of an issuer. They may include shareholders (including independent shareholders) business partners, employees, suppliers, sub-contractors, consumers, regulators and the public.
- 12. The ESG report could disclose the issuer's stakeholders and the basis for their identification. It may also disclose the activities the issuer has arranged to engage stakeholders, the objectives and how it has responded to stakeholders' views. Stakeholder engagement may be conducted through meetings (e.g. personal or annual general meetings), conferences, workshops, advisory committees, round-table discussions, focus groups, questionnaires, web-based forums and written consultations.
- 13: The ESG report may also disclose a mechanism for stakeholders to provide feedback.

	No

Reporting guidance

Do you agree with the guidance under the Reporting Guidance s	section	Buidance s	porting Gu	the Repo	under	guidance	ı the	with	аетее	Do you	5
---	---------	------------	------------	----------	-------	----------	-------	------	-------	--------	---

The proposed Reporting Guidance section states:

Scope of reporting

4 The ESC, report could state which entities in the group and/or which operations have been included for the report, if there is change in the scope, the issuer could explain the difference and reason for change.

Approaches to reporting

- 15. Once an issuer starts reporting, it could continue to do so regularly. The aspects and KPIs reported could be consistent for each period or there could be an explanation of the changes. An issuer may also explain why some aspects and KPIs are not reported.
- 16. An ESG report could state the issuer's ESG management approach, strategies, priorities, objectives and explain how they relate to its business. It could discuss the issuer's management, measurement and monitoring system to implement its ESG strategies.
- [7] An ESC report could also discuss ESC opportunities risks, challenges and how
 they are addressed. For example, a tolecommunication company may see an
 opportunity to promote teleconferencing as an alternative to travel due to climate
 change concerns: An information and technology company may see the damage
 to its reputation from a breach in consumer privacy, as an ESC risk

Reporting on line items

- 18. The Guide does not provide a definition for each KPL An issuer could explain thow the KPIs are calculated and include information that is necessary for interpreting the KPIs. It may use the same definition and calculation method each period for comparison over time. If there is a change to the definition or calculation method, the Issuer could explain the difference and reason for the change.
- 10. Over time, an issuer may present time series of data for comparison over a period

 it already reported on. The time period used may be consistent for every report.
- 20. An issuer may report line items with objective and representative industry benchmarks
- 201: Quantitative information could be presented in a table format.

		No			
	If you	r answer is "No", please give reasons and alternative views.			

I generally agree with this proposal. But I note that under the IFRS/HKFRS, there are currently no disclosure requirements for ESG matters. In other words, unlike financial reporting, ESG reporting is largely unregulated.

I think HKICPA needs to act fast so as to set up a clear, comprehensive and comparable reporting framework for ESG. Otherwise, quality of the data and information contained in ESG Report may not be assured.

ESG report would only be useful if any only if it is both high quality user-friendly.

Chapter 13

EQUITY SECURITIES

CONTINUING OBLIGATIONS

Environmental and Social Matters

13.91 Issuers are encouraged to include information set out in Appendix 27 in the annual report regarding the same period covered in the annual report, or as a separate report.

Note: Where the information is included in a separate report, it does not need to be issued at the same time or cover the same period as the annual report. An issuer is free to report on any period but should consistently report on the same period so that the information can be comparable.

Environmental, Social and Governance Reporting Guide

Introduction

1. This guide sets out Environmental, Social and Governance ("ESG") subject areas, aspects, general disclosure and key performance indicators ("KPIs").

bject areas, sperete

- 2. This guide is not comprehensive. We encourage an issuer to identify and disclose additional ESG issues and KPIs that are relevant to its business. It may also refer to existing international ESG reporting guidance for its relevant industry or sector.
- 3. An issuer may adopt a higher level of ESG reporting based on international guidance and standards. ("GRI")
- 4. An issuer may disclose the ESG information in its annual report regarding the same-period covered in the annual report, or in a separate report, in print or on its website. Where the information is included in a separate report, an issuer is free to report on any period.
- 5. It is important to involve the board of directors in preparing the ESG report. The board of directors is responsible for ESG reporting but it may delegate the task of compiling the ESG report to its omployees or a committee that reports to the board.

How this guide is organised

Demin management

- 6. There are four ESG subject areas: Workplace Quality, Environmental Protection, Operating Practices and Community Involvement. Corporate Governance is not included as it is dealt with separately in Appendix 14 of the Main Board Listing Rules.
- 7. Each subject area has various aspects. For each relevant aspect, an issuer could report on the general disclosure and KPIs that indicate its performance.
