

Part B Consultation Questions

Please indicate your preference by checking the appropriate boxes. Please reply to the questions below on the proposed change discussed in the Consultation Paper downloadable from the HKEX website at:

<http://www.hkex.com.hk/-/media/HKEX-Market/News/Market-Consultations/2016-Present/May-2019-Review-of-ESG-Guide/Consultation-Paper/cp201905.pdf>.

Where there is insufficient space provided for your comments, please attach additional pages.

Timeframe for Publication of ESG Reports

1. Do you agree with our proposal to amend Main Board Listing Rule 13.91 and GEM Listing Rule 17.103 to shorten the time required to publish an environmental, social and governance (“ESG”) report from three months after the publication of the annual report to within four months for Main Board issuers or three months for GEM issuers from the financial year-end date?

Yes

No

Please give reasons for your views.

Although it might be quite rush for smaller issuers who have less resources in preparing the ESG report, it is not impossible to release the report within four months

Printed Form of ESG Reports

2. Do you agree with our proposal to amend the Listing Rules and the Guide to clarify that issuers are not required to provide printed form of the ESG report to shareholders unless responding to specific requests, but are required to notify shareholders that the ESG report has been published on the Exchange’s and the issuer’s websites?

Yes

No

Please give reasons for your views.

To reduce the use of paper, it is recommendable to issue paperless report. Also, notification to the shareholders of the issuance of the report should also be done electronically, eg. on the issuer's homepage

Introducing Mandatory Disclosure Requirements

General

3. Do you agree with our proposal to amend the Guide to introduce Mandatory Disclosure Requirements (“MDR”)?

Yes

No

Please give reasons for your views.

But depends on the nature of the disclosable item

Governance Structure

4. If your response to Question 3 is positive, do you agree with our proposal to introduce an MDR requiring a statement from the board containing the following elements:

(a) a disclosure of the board’s oversight of ESG issues?

(b) the process used to identify, evaluate and manage material ESG-related issues (including risks to the issuer’s businesses); and

(c) how the board reviews progress made against ESG-related goals and targets?

Yes

No

Please give reasons for your views.

These kinds of information will not change often. It is rather meaningless to disclose them every year.

5. Do you agree with our proposal to set out in a note that the board statement should include information on the issuer's current ESG management approach, strategy, priorities and goals/targets and an explanation of how they relate to the issuer's businesses?

Yes

No

Please give reasons for your views.

Please define "board statement"

Reporting Principles

6. Do you agree with our proposal to amend the Guide to introduce an MDR requiring disclosure of an explanation on how the issuer has applied the Reporting Principles in the preparation of the ESG report?

Yes

No

Please give reasons for your views.

This information does not change very often. It is rather meaningless to disclose it every year.

7. Do you agree with our proposal to amend the Reporting Principle on "materiality" to make it clear that materiality of ESG issues is to be determined by the board and that the issuer must disclose a description of significant stakeholders identified, the process and results of the issuer's stakeholder engagement (if any), and the criteria for the selection of material ESG factors?

Yes

No

Please give reasons for your views.

These kinds of information do not change very often. It is rather meaningless to disclose them every year.

8. Do you agree with our proposal to amend the Reporting Principle on “quantitative” to:

- (a) require disclosure of information on the standards, methodologies, assumptions and/or calculation tools used, and source of the conversion factors used for the reporting of emissions/energy consumption (where applicable); and
- (b) clarify that while key performance indicators (“KPIs”) for historical data must be measurable, targets may be expressed by way of directional statements or quantitative descriptions?

Yes

No

Please give reasons for your views.

(a) disclosure of standards, methodologies, etc would allow the stakeholder to understand better how the KPIs are calculated.
(b) As many of the environmental KPIs involve highly professional skills to calculate and interpret, most of the issuers might not have such skills. Therefore allowing qualitative targets is a more practical approach.

Reporting Boundary

9. Do you agree with our proposal to amend the Guide to include an MDR requiring an explanation of the ESG report’s reporting boundary, disclosing the process used to identify the specific entities or operations that are included in the ESG report?

Yes

No

Please give reasons for your views.

It would help the stakeholders to understand which entities or operations are included in the report and the reason why they are included.

Introducing Aspect on Climate Change and Revising the Environmental KPIs

Climate Change

10. Do you agree with our proposal to introduce a new Aspect A4 requiring:
- (a) disclosure of policies on measures to identify and mitigate the significant climate-related issues which have impacted, and those which may impact the issuer; and
 - (b) a KPI requiring a description of the significant climate-related issues which have impacted, and those which may impact the issuer, and the actions taken to manage them?

Yes

No

Please give reasons for your views.

The climate-related issues that might impact the issuer is in fact too vague and too broad. It also would not change often. Therefore it is rather meaningless to disclose them every year.

Targets

11. Do you agree with our proposal to amend the Environmental KPIs to require disclosure of a description of targets set regarding emissions, energy use and water efficiency, waste reduction, etc. and steps taken to achieve them?

Yes

No

Please give reasons for your views.

On condition that quantitative targets are not required as it is unrealistic for an issuer to decide what to be done in order to reduce say one tonne of GHG.

GHG Emissions

12. Do you agree with our proposal to revise an Environmental KPI to require disclosure of Scope 1 and Scope 2 greenhouse gas (“GHG”) emissions?

Yes

No

Please give reasons for your views.

It would help the stakeholders to understand to what extent the issuer is a direct source of GHG emissions and what kind of measure might help to reduce or control such emission.

Upgrading the Disclosure Obligation of the Social KPIs

13. Do you agree with our proposal to upgrade the disclosure obligation of all Social KPIs to “comply or explain”?

Yes

No

Please give reasons for your views.

It depends on the nature of the KPI.

Revising the Social KPIs

Employment Types

14. Do you agree with our proposal to revise a KPI to clarify "employment types" should include "full- and part-time" staff?

Yes

No

Please give reasons for your views.

It would be helpful to the investors to understand better the structure of an issuer's staff costs.

Rate of Fatalities

15. Do you agree with our proposal to amend the KPI on fatalities to require disclosure of the number and rate of work-related fatalities occurred in each of the past three years including the reporting year?

Yes

No

Please give reasons for your views.

Some industries have higher chance of work-related fatalities, eg. the construction industry. Disclosure of such information would only create a bigger bias of the stakeholders against certain industries.

Supply Chain Management

16. Do you agree with our proposal to introduce the following new KPIs in respect of supply chain management?

(a) Description of practices used to identify environmental and social risks along the supply chain, and how they are implemented and monitored.

(b) Description of practices used to promote environmentally preferable products and services when selecting suppliers, and how they are implemented and monitored.

Yes

No

Please give reasons for your views.

These kinds of information do not change often. It is rather meaningless to disclose them every year.

Anti-corruption

17. Do you agree with our proposal to introduce a new KPI requiring disclosure of anti-corruption training provided to directors and staff?

Yes

No

Please give reasons for your views.

It may elevate the issuers' awareness on the need to provide anti-corruption training periodically.

Encouraging Independent Assurance

18. Do you agree with the proposal to revise the Guide's wording on independence assurance to state that the issuer may seek independent assurance to strengthen the credibility of ESG information disclosed; and where independent assurance is obtained, the issuer should describe the level, scope and processes adopted for assurance clearly in the ESG report?

Yes

No

Please give reasons for your views.

While independent assurance on the environmental part might be necessary as many of the KPIs require highly professional knowledge to calculate and interpret, there is no necessity to seek for independent assurance on social KPIs as the issuers themselves should be able to provide correct information.
