

09.08.2016

I am an investor and I support the proposal put forward in the consultation paper. I think the overall quality and performance of many IPOs (especially in the gem board) in the last few years is already evident that something has gone wrong in the listing approval process. I think the SFC should take on a more active role in balancing the public interest against the corporate goals of the HKEx and stakeholders in the I-Bank community.
