Subject: Against the SFO Consultation

I oppose to the Consultation Paper for it is in breach of the SFO, it shall be put to the Legislative Council for approval.

There has been cases showing the quality of the listing applicants being questionable, but it only represents a small proportion of the number of newly listed companies during the past decade. It could demonstrate that the Hong Kong Stock Exchange, with the help of the Listing Committee comprising highly qualified market practitioners, has been screening the suitability of the listing applicant effectively. Having said that the Hong Kong Stock Exchange is a commercial organization which performance has to be accountable to its shareholders, the Hong Kong Stock Exchange has been well-known for upholding its role of front-line regulator for listing applicants in the international finance market.
