- IPO pipeline remains strong with over 150 active applications, including 10 SPAC applications (as at 31 March 2022)

Q1 2022 selected strategic highlights

Enhancing our listing framework

- **Special Purpose Acquisition Company (SPAC) listing** went live, and the first SPAC listed in Mar 2022
- Enhanced and streamlined **listing for overseas issuers** took effect since Jan 2022

Modernising our operations and infrastructure

- **Initiated an end-to-end review of the operating model of our Hong Kong businesses**, aiming for targeted improvements to support HKEX's vision to build the Marketplace of the Future

Reinforcing HKEX as Asia's trading and risk management hub

- **Published consultation conclusions for Derivatives Holiday Trading (DHT)**, with MSCI derivatives product suite being the first products, commencing in May 2022
- **Launched multiple new thematic ETFs**, including the first metaverse-themed ETF, first carbon futures ETF, and first Hong Kong equity ESG ETF
- Announced the launch of a **new digital investor relations platform, IR Connect**, in Q3 2022 to support issuers with an investor engagement and intelligence portal

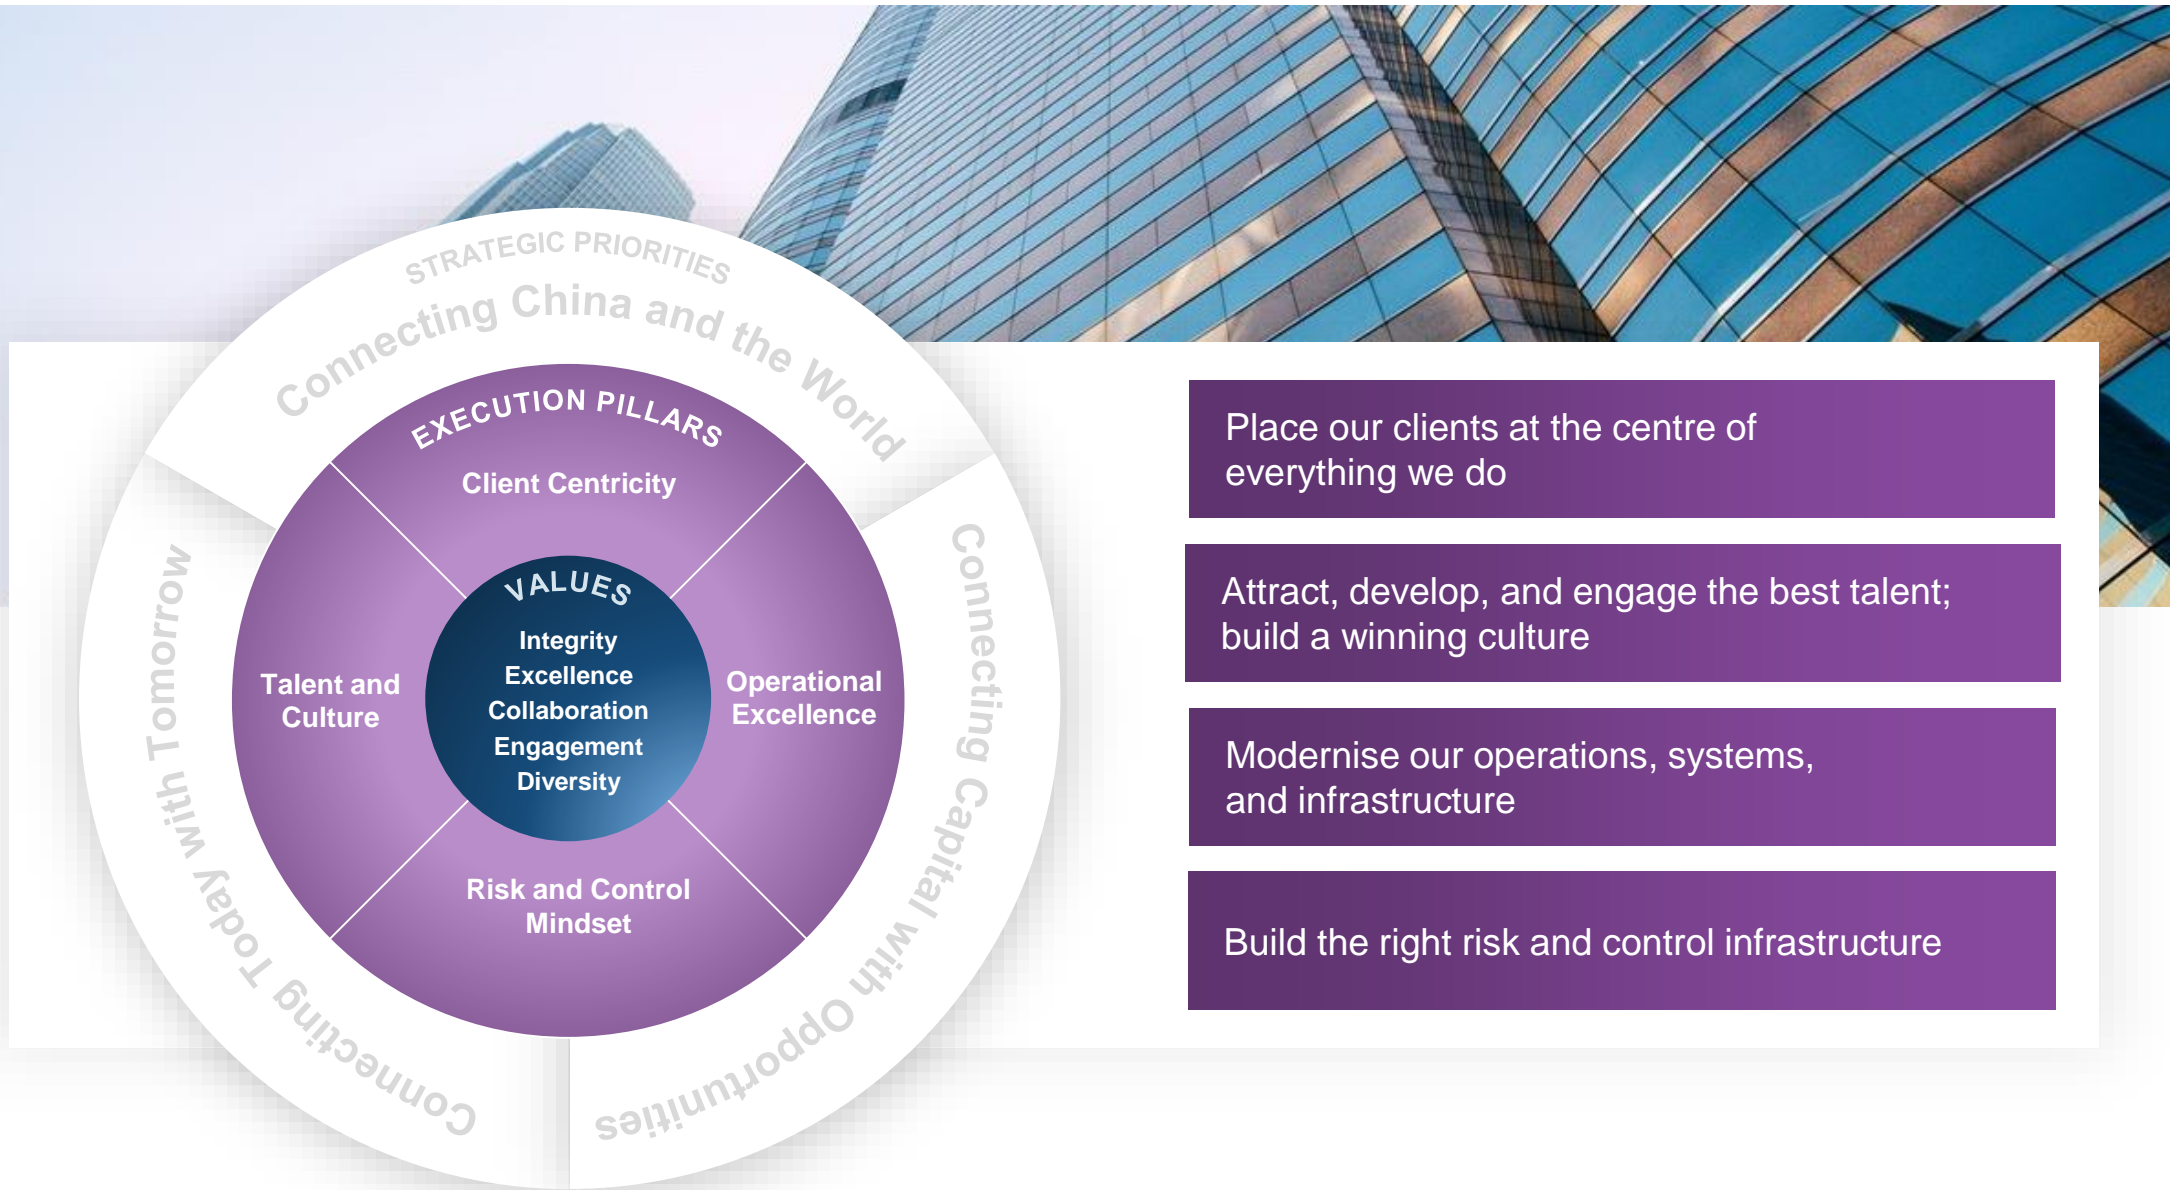

Embedding sustainability within our business and markets

- Signed a **Memorandum of Understanding (MOU) with China Emissions Exchange (CEEX)** to explore cooperation in tackling climate change and promoting sustainability through **carbon finance**
- **96 sustainable-focused products were displayed on STAGE** at end of Mar 2022. 26 green / ESG-related bond listings - raising a total of HK\$71.4bn in Q1 2022 (vs 19 listings raising HK\$51.5bn in Q1 2021)
- HKEX Foundation launched an **enhanced HKEX Impact Funding Scheme**

Three key strategic imperatives support our vision...

...with clear execution pillars and our values

Looking ahead

- **Cash Market trading volumes will continue to be affected by macro and geopolitical factors** after an exceptionally buoyant Q1 2021
- Macro-driven weak market sentiment continued to impact the IPO market, but **the IPO pipeline remains strong**, supported by Chinese companies seeking homecoming listings and new listing regime for SPACs and overseas issuers
- **Persistent inflationary pressures, tightening of monetary policy, upcoming interest rate hikes and geographical fragility** could continue to impact returns on the external portfolio; but interest rates hikes should help internally managed investment income
- **Geopolitical tensions, weak global market sentiment, pricing volatility in commodities market** will continue to provide headwinds to our business, but **the relaxation of pandemic social and travel restrictions globally** could provide cautious optimism
- **Continued investments in client, technology, talent and risk management** will underpin focused strategy
- Fully focused on delivering our vision to build **the Marketplace of the Future**
