

The **MSCI Taiwan Index**, which is the third-largest constituent of MSCI’s benchmark emerging markets index, is designed to measure the performance of the large and mid-cap segments of the Taiwanese market. With 88 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in Taiwan.

The **MSCI Taiwan Net Total Return Index** captures Taiwan market performance in a net total return form (i.e. reinvestment of net dividend payout into the index portfolio) denominated in USD.

Features

The introduction of the MSCI Taiwan (USD) Index Futures and the MSCI Taiwan Net Total Return (USD) Index Futures provides a tool for investors to trade and hedge their exposure in the equity market of Taiwan based on an international benchmark. The futures contract is USD-denominated and can be traded both in Asian time zone (day trading session) and Europe/US time zone (after-hours trading session).

Index Performance (September 2015 – March 2022)
