1. Clearing Members still need to settle End-of-day Variation Margin with regard to applicable non-HKD currency during the aforesaid period. Clearing Members are reminded the importance of having proper arrangement in place before and after the holiday period as those days are normal settlement days. In case of any key staffs on vacation before and after the holiday period, please ensure the backup staffs are familiar with the operational procedures to adequately monitor their exposure and fulfill the settlement obligations on time.
2. The application of Holiday Margin and Northbound Holiday Margin will increase Clearing Members' Margin requirements. The impact will vary depending on individual Clearing Member's portfolios. Clearing Members may contact us (via the hotline and email address mentioned above) to assess the potential impact on their Margin requirements.
3. Clearing Members should be fully aware of the above measures and make the necessary funding arrangements. Clearing Members are advised to keep adequate levels of Excess Margin. End-of-Day Initial Margin calls will be issued if a Clearing Member's Margin Balance falls short of its Initial Margin requirement.
