## INTRODUCTION

Hong Kong Exchanges and Clearing Limited (HKEX) introduced Third Party Clearing (TPC) services to the securities market on 3<sup>rd</sup> December, 2007. Before the launch of TPC, all Exchange Participants of The Stock Exchange of Hong Kong Limited (SEHK) are required to become Broker Participants (re-named as Direct Clearing Participant (DCP) after the launch of TPC) of Hong Kong Securities Clearing Company Limited (HKSCC), and they have to clear and settle all Exchange Trades executed on SEHK in Central Clearing and Settlement System (CCASS) of HKSCC themselves. In CCASS, DCPs clear and settle Exchange Trades either under the Continuous Net Settlement (CNS) system or Isolated Trades (IT) system (a description of the two systems can be found in the HKEX website: [https://www.hkex.com.hk/Services/Clearing/Securities/Overview?sc\\_lang=en](https://www.hkex.com.hk/Services/Clearing/Securities/Overview?sc_lang=en)).

Under the CNS system, where HKSCC acts as the central settlement counterparty, DCPs are subject to a number of risk management measures that HKSCC adopts to manage and monitor its counterparty risk exposure (an overview of the risk management measures can be found in the HKEX website: [https://www.hkex.com.hk/Services/Clearing/Securities/Risk-Management?sc\\_lang=en](https://www.hkex.com.hk/Services/Clearing/Securities/Risk-Management?sc_lang=en)).

This document describes, at a high level, the key features introduced by the TPC model to the clearing infrastructure of the securities market.

The TPC model was first presented in a consultation paper issued by HKEX back in 2002 (which can be viewed or downloaded at the HKEX website: [https://www.hkex.com.hk/News/Market-Consultations/Before-2005?sc\\_lang=en](https://www.hkex.com.hk/News/Market-Consultations/Before-2005?sc_lang=en)). To ensure that the model conforms to the international standards and is in line with the developments in other major financial markets, certain features of the model had since been refined to address various suggestions and comments received from market participants over the past years with reference made to the established market practices overseas.

With the launch of Shanghai-Hong Kong Stock Connect (Shanghai Connect) and Shenzhen-Hong Kong Stock Connect (Shenzhen Connect) in 2014 and 2016 respectively, the TPC arrangement also extended to cover China Connect Securities Trades which are cleared and settled under the CNS system.

The TPC model has been further enhanced in November 2019 to provide flexibility for Exchange Participants of SEHK to select its clearing arrangement in Hong Kong and China Connect Markets.

Readers are reminded that this document is intended for reference only. It may need to be revisited from time to time to ensure that they are current with the latest model being implemented. Readers are therefore encouraged to visit the [TPC corner](#) of the HKEX website for most updated information on TPC.

# THE MODEL

## 1. Additional Types of CCASS Participants

Before the launch of TPC (TPC was launch on 3<sup>rd</sup> December 2007), an Exchange Participant needed to be a CCASS Broker Participant and could only perform self-clearing in CCASS. The TPC model allows the segregation of trading and clearing participants. An Exchange Participant who trades on SEHK has the option to choose to become a clearing participant in CCASS or outsource its clearing functions to another clearing participant whose business is to provide third party clearing services to Exchange Participants. Under TPC, an Exchange Participant without a clearing participants in CCASS is referenced as a Non-Clearing Participant (NCP)<sup>1</sup>.

Broker Participant of CCASS is replaced by two types of Clearing Participants namely General Clearing Participant (GCP) and Direct Clearing Participant (DCP)<sup>2</sup>. Except for Broker Participant who has been re-classified as DCP, other categories of CCASS Participants like Custodian Participants, Investor Participants etc. will not be affected.

After the launch of Shanghai Connect and Shenzhen Connect, Clearing Participants have to register as China Connect Clearing Participants (CCCPs) to clear and settle China Connect Securities Trades<sup>3</sup>. With the enhancement of the TPC model in November 2019, an Exchange Participant who is an NCP is allowed to outsource its clearing functions in Hong Kong and China Connect Markets to different GCPs.

### 1.1 General Clearing Participant (GCP)

A GCP can provide third party clearing services to other Exchange Participants who wish to become an NCP. A GCP<sup>4</sup> is not required to hold any Stock Exchange Trading Right or be an Exchange Participant. If a GCP is also an Exchange Participant and has registered as a China Connect Exchange Participant (CCEP) and CCCP, it can clear and settle all of its own and its underlying NCPs' Exchange Trades<sup>5</sup> and China Connect Securities Trades in CCASS.

Those who are interested to become GCPs should apply to HKEX who will assess their applications based on the following admission criteria:

---

<sup>1</sup> NCP itself is not a participant type either in SEHK or HKSCC. It is a generic term for ease of classification and reference only.

<sup>2</sup> GCP and DCP are collectively referred to as CCASS Clearing Participants.

<sup>3</sup> China Connect Securities Trade is defined in the Rules of the Exchange as a trade in China Connect Securities (including Special China Connect Securities) executed on a China Connect Market through the use of the China Connect Services.

<sup>4</sup> Despite the fact that Registered Institution is eligible to become a GCP, Registered Institution is not eligible to become an Exchange Participant.

<sup>5</sup> Exchange Trade is defined in the Rules of the Exchange as a trade in an Eligible Security (other than a China Connect Security) either reported to the Exchange by an Exchange Participant or effected on the Exchange.

To become a GCP, an applicant must be either a Licensed Corporation licensed to carry on Type 1 regulated activity or a Registered Institution registered to carry on Type 1 regulated activity under the Securities and Futures Ordinance.

To be eligible to become a GCP, a Licensed Corporation must:

- (i) be a company limited by shares incorporated in Hong Kong; and
- (ii) have liquid capital of not less than HK\$300,000,000 or its required liquid capital under the Financial Resources Rules, whichever is the higher; or
- (iii) have paid-up share capital of not less than HK\$300,000,000 and liquid capital of not less than HK\$100,000,000 or its required liquid capital under the Financial Resources Rules, whichever is the higher.

To be eligible to become a GCP, a Registered Institution must have Tier 1 capital under the Banking (Capital) Rules of not less than HK\$390,000,000 or such other level as prescribed by HKSCC from time to time.

In both of the above cases, an applicant must be able to demonstrate to the satisfaction of HKSCC that it has an established clearing business in securities listed and/or traded on SEHK or it has the financial and operational capacity to establish and operate a clearing business in securities listed and/or traded on SEHK.

Similar to CCASS DCPs, a GCP is required to sign a Participant Agreement and pay admission fee to HKSCC. The admission fee for a GCP is charged at HK\$50,000 per Stock Exchange Trading Right held by itself (if GCP is also an Exchange Participant). In the case of a GCP who is not an Exchange Participant, it is still required to pay an admission fee of HK\$50,000.

Other requirements applicable to DCPs such as paying Guarantee Fund Contribution, arranging indemnity insurance and/or providing, if required, assurances acceptable to HKSCC in respect of its obligations to HKSCC as a result of its participation in CCASS should also be met upon admission.

To meet these admission requirements, GCP may also need to demonstrate its business capabilities in clearing operations including appropriate internal control measures and a robust risk management framework etc. to the satisfaction of HKSCC. Other than HKSCC's admission requirements, GCP must fulfill any regulatory requirements of the SFC and HKMA for licensing purpose.

For the CCCP registration requirements, please refer to [Explanatory Notes for Registration for the Use of Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect](#) for details.

## **1.2 Direct Clearing Participant (DCP)**

A DCP must be an Exchange Participant and can only clear its own trades. A DCP can only clear its own China Connect Securities Trades if it has registered as a CCCP. The admission requirements of a DCP are the same as those of CCASS Broker Participants in the previous framework (i.e. before 3<sup>rd</sup> December 2007). An Exchange Participant who continues to self clear in CCASS is a DCP and its rights and obligations in SEHK and HKSCC as a Broker Participant before 3<sup>rd</sup> December 2007 remains unchanged.

### **1.3 SEOCH Participants**

An Exchange Participant may also trade options on SEHK and clear its options contracts in the Derivatives Clearing and Settlement System (DCASS) of The SEHK Options Clearing House Ltd (SEOCH). Although such Exchange Participant is still required to become an Options Trading Exchange Participant and if it conducts self clearing, a SEOCH Participant<sup>6</sup>, it is no longer required to be a CCASS Clearing Participant under the TPC model. The Exchange Participant can appoint a GCP in CCASS to clear its Exchange Trades on SEHK and handle the clearing and settlement of its exercised/assigned stock options contracts from DCASS, i.e. "Clearing Agency Transactions" as defined in CCASS.

## **2 Appointment of GCP and Clearing Agreement**

### **2.1 Exchange Participant**

Under the TPC model, an Exchange Participant must be either a DCP itself or has appointed GCP(s) to clear and settle its Exchange Trades and China Connect Securities Trades in CCASS. Where the Exchange Participant is an NCP and also participates in the Exchange Traded Options Business and is a SEOCH Participant, the GCP appointed to clear Exchange Trades on SEHK is also responsible for the clearance and settlement of the Exchange Participant's Clearing Agency Transactions in CCASS.

An Exchange Participant who is not a CCASS Clearing Participant can only commence trading on SEHK after its appointment of GCP(s) has become effective so as to support the clearing and settlement of its Exchange Trades and (if applicable) China Connect Securities Trades. An Exchange Participant appointing GCP(s) must submit the Form 11 - Notification of Execution of Clearing Agreement and Change of Clearing Relationship to SEHK. The GCP must ensure that the Clearing Agreement facilitates the performance of, and is consistent with the GCP's obligations under the CCASS Rules and Operational Procedures. It is not necessary to provide a copy of the Clearing Agreement when submitting such notification. The GCP shall nevertheless be required to supply HKSCC with a certified copy of any executed Clearing Agreement to which it is or has been a party at any time

---

<sup>6</sup> TPC has long been adopted in the stock options market with a number of SEOCH Participants already admitted as GCPs in SEOCH. Therefore, an Exchange Participant may appoint a GCP of SEOCH to clear and settle its options contracts instead.

requested by HKSCC to do so. Once HKSCC is notified, the third party clearing relationship in CCASS to support the Exchange Participant's trading on SEHK will be effected.

For the Exchange Participant currently appoints one GCP for clearing and settlement of its Exchange Trades and China Connect Securities Trades and wishes to appoint another GCP for either Exchange Trades or China Connect Securities Trades only, Exchange Participant and/or existing GCP responsible for clearing and settlement of both Exchange Trades and China Connect Securities Trades is required to submit Form 11 to SEHK to confirm the GCP appointment for the trades that continue to have valid, binding and effective Clearing Agreement.

## **2.2 Clearing Obligations of GCP**

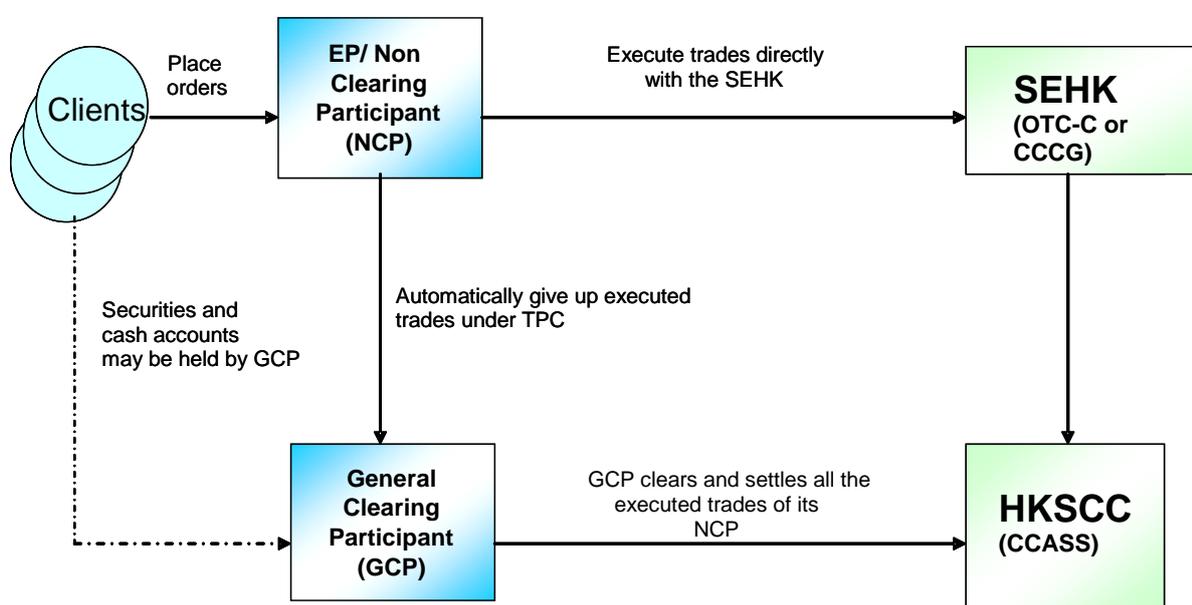

The key obligations specific to GCP has been included in Chapter 40 of the General Rules of CCASS (CCASS Rules). The details of the rules can be found at the HKEX website: [https://www.hkex.com.hk/Services/Rules-and-Forms-and-Fees/Rules/HKSCC/Rules?sc\\_lang=en](https://www.hkex.com.hk/Services/Rules-and-Forms-and-Fees/Rules/HKSCC/Rules?sc_lang=en) and are outlined below:

- A GCP should have arrangement in place with each NCP for the NCP to notify it of all Exchange Trades and/or China Connect Securities Trades concluded by the NCP, and all Clearing Agency Transactions of which the NCP is a party.
- A GCP should have arrangement in place to monitor the ability of each NCP with whom it has entered into a Clearing Agreement to satisfy promptly all obligations arising from the Exchange Trades, Clearing Agency Transactions and/or China Connect Securities Trades concluded by such NCP. A GCP must forthwith notify HKSCC of any failure of its NCP to meet its obligations under the Clearing Agreement.
- A GCP should, within a period as HKSCC may specify, provide information in its possession about its NCPs to HKSCC, including but not limited to, financial position, a NCP's underlying client information or any other information or documents as HKSCC may demand.
- A GCP should ensure that the Clearing Agreement to which it is or has been a party, and all subsequent agreements to amend the Clearing Agreement do not contain any provision which is inconsistent with the Rules and has terms and conditions to facilitate the performance of, and be consistent with, the GCP's obligations under the Rules. The Clearing Agreement should incorporate any additional conditions prescribed by HKSCC from time to time. A GCP shall be bound by and comply strictly with the terms of each Clearing Agreement to which it is or has been a party, to the extent that those Clearing Agreements are consistent with the Rules.
- A GCP should notify HKSCC of any changes to any of the Clearing Agreements it entered into forthwith upon such changes being made. For the avoidance of doubt, a GCP must ensure that any changes to the Clearing Agreement and any amendment agreement are in compliance with these Rules.

### 3 Trade Execution, Clearing and Settlement

#### 3.1 Execution of Exchange Trades and China Connect Securities Trades

The TPC model does not change how an Exchange Participant executes its trade orders on SEHK. For NCP, once an Exchange Trade or a China Connect Securities Trade is effected on or reported to SEHK, the NCP concerned will be substituted by its GCP as a party to the Exchange Trade or China Connect Securities Trade. The GCP will then take up the clearing and settlement obligations regarding the Exchange Trade or China Connect Securities Trade. The following diagram shows the trading and settlement flow under the TPC model:

#### 3.2 Clearing and Settlement

Exchange Trades are cleared and settled under either the Continuous Net Settlement (CNS) system or Isolated Trade (IT) system and China Connect Securities Trades are cleared and settled under the CNS system in CCASS. DCP and GCP are responsible for settling CNS trades with HKSCC after novation and on a netted basis. Settlement of Isolated Trades is on a bilateral trade-by-trade basis directly between the clearing participants and in the case of an NCP, its GCP and the original trading counterparty of the NCP (or its GCP, where applicable).

If an Exchange Participant is a DCP, its trades will be captured in its own CCASS account; same as for a Broker Participant today. For Exchange Trades and China Connect Securities Trades executed by an NCP on SEHK, they are cleared and settled by its GCP(s) and hence all its Exchange Trades and China Connect Securities Trades will be automatically routed to its GCP(s)' account in CCASS. Selective give-up and take-up arrangement at individual trade level is not allowed. If

a GCP provides clearing services to more than one NCP, all Exchange Trades and China Connect Securities Trades executed by these NCPs on SEHK will be routed to the same account of the GCP in CCASS and for those Exchange Trades and China Connect Securities Trades to be settled under the CNS system, they will be netted for settlement purpose.

GCP is responsible to develop its own risk management capability in monitoring its exposure to NCP, which may involve providing appropriate trading and back office systems to intercept NCP's trades prior to or immediately after trade orders have been executed on SEHK.

To support GCP's clearing and settlement operations, two existing CCASS reports namely Provisional Clearing Statement and Final Clearing Statement are enhanced to provide the trade details and CNS positions at its underlying NCP level. In order to facilitate GCP's monitoring process, CCASS also provides:

- (i) Intra-day Trade File ten times on each trading day shortly after 09:45, 10:15, 10:45, 11:30, 12:00, 13:15, 14:00, 14:45, 15:30 and 16:25;
- (ii) NCP Marks Projection Report after the intra-day Marks processing at around 11:45 and day-end Marks processing at 20:15 showing estimated amount for each of NCP of the GCP;
- (iii) NCP Margin Projection Report after intra-day Margin processing at around 11:45 or 14:45 and day-end Margin processing at 20:15 showing estimated amount for each of NCP of the GCP; and
- (iv) NCP(s) Guarantee Fund Contribution Projection by Position at around 12:00 noon after completion of the Guarantee Fund review processing showing the estimation of Guarantee Fund contribution for each NCP of the GCP.

Report description, report sample and data file layout of the above reports where available can be found at the HKEX website: [https://www.hkex.com.hk/Services/Clearing/Securities/Infrastructure/CCASS-3-Terminal/CCASS-and-CCMS-Terminal-User-Guide-for-Participant/4,-d-,3-Report-Data-File-Description?sc\\_lang=en](https://www.hkex.com.hk/Services/Clearing/Securities/Infrastructure/CCASS-3-Terminal/CCASS-and-CCMS-Terminal-User-Guide-for-Participant/4,-d-,3-Report-Data-File-Description?sc_lang=en).

In addition, an on-line function is provided for GCP to enquire the details of all its third party clearing relationships and the relevant details of each clearing arrangement, including the commencement and termination dates for each clearing relationship.

If there is trade amendment on T+1 for Exchange Trades, the amendment remains to be submitted to SEHK by the relevant Exchange Participant. For NCP, the amended trades will automatically be updated to the account of its GCP for clearing and settlement purpose.

The existing buy-in procedures apply to both DCP and GCP if short CNS positions remain undelivered at the end of the settlement date, i.e. T+2 for Exchange Trades and T for China Connect Securities Trades, unless exemption of buy-in has been granted by HKSCC. Same as today's practice, HKSCC continues to initiate its

compulsory stock borrowing programme for Exchange Trades at the end of T+2 to meet its settlement obligations to receiving clearing participants as a result of the undelivered short CNS positions. Both DCP and GCP can become lenders under this programme.

#### **4. Clearing Agency Transactions**

An NCP's clearing and settlement obligation in respect of a Clearing Agency Transaction in SEOCH is substituted by its GCP as a party to the transaction upon the exercise/assignment of a stock options contract in DCASS. The NCP's Clearing Agency Transactions are recorded in CCASS in the name of its GCP and captured in the GCP's CCASS account automatically. In line with the existing process in clearing and settling Clearing Agency Transactions for DCPs, HKSCC acts as the central counterparty to all transactions through a novation process. All Exchange Trades and Clearing Agency Transactions on account of the GCP, whether for itself or for its underlying NCPs, if settled under the CNS system are netted for settlement purpose.

A GCP providing clearing services to an NCP in respect of Clearing Agency Transactions also needs to manage the NCP's stock collaterals maintained in the Common Collateral Management System (CCMS) of HKSCC. The NCP can, having made prior arrangement with the GCP, make use of its securities deposited in the CCASS account of the GCP as collateral for its participation in SEOCH purpose.

#### **5. Client Account Arrangement**

An Exchange Participant becoming an NCP is no longer required to be a CCASS Participant. Securities of the NCP and its clients need to be kept with the GCP (unless the NCP or its clients have appointed their own custodians) based on the commercial arrangement agreed between the NCP and GCP. Generally, an NCP can adopt either the "fully disclosed" or "omnibus" approaches in managing client accounts for its clients. Under the "fully disclosed" account arrangement, NCP discloses client information to the GCP who establishes securities account directly with each of the NCP's clients. These individual client accounts are therefore only carried in the books of the GCP and not the NCP. Under the "omnibus" account arrangement, an NCP maintains an omnibus account with the GCP and the NCP maintains client accounts and retains full responsibility on providing client side services including client settlements. Nevertheless, an NCP may use a combination of both approaches in managing its clients' portfolios and relationships.

For China Connect Markets, securities of the NCP as well as its clients need to be kept with the GCP (unless the NCP and its clients have appointed their own custodians) for pre-trade checking. GCP has to submit Stock Account Mapping Maintenance Form for the Use of Shanghai Connect and Shenzhen Connect to

indicate the stock account(s) designated for holding China Connect Securities on behalf of the NCP.

## **6. Depository and Nominee Services**

HKSCC operates the CCASS Depository which provides deposit and withdrawal services to all CCASS Participants. With TPC, an NCP does not have direct access to CCASS as it is not a CCASS Participant. Its securities holdings (including client securities) are maintained by the GCP in CCASS either on a fully disclosed account basis or an omnibus account basis. As a result, all deposits or withdrawals of share certificates with CCASS are processed on account of the GCP. As China Connect Securities are uncertificated securities, physical deposit and withdrawal of China Connect Securities into/from the CCASS Depository are not available.

Except for China Connect Securities, an NCP who wishes to deposit or withdraw share certificates directly at CCASS Depository can do so by obtaining proper authorisation from its GCP in accordance with the CCASS Rules and CCASS Operational Procedures. It should be noted that any deposit made under this arrangement into the CCASS stock account of a GCP is deemed as a deposit made by the GCP itself and HKSCC applies risk management measures against defective securities on account of the GCP. If client securities of an NCP are handled directly by a GCP under the fully disclosed account arrangement, the GCP should follow the current CCASS Rules and CCASS Operational Procedures to deposit and withdraw share certificates for these clients.

Similarly, HKSCC provides nominee services to CCASS Participants only. For client securities kept directly with the GCP under the fully disclosed account arrangement, the GCP is the intermediary providing nominee services to these clients whereas an NCP who holds securities for its clients under the omnibus account arrangement still acts as the intermediary of its clients and provide nominee services to them directly.

## **7. Risk Management Measures adopted by HKSCC**

The current risk management measures on CNS trades and defective securities apply to both DCP and GCP. These risk management measures include trade isolation, securities-on-hold, marking-to-market and collection of Marks and collaterals. As NCP becomes a client of the GCP, no special risk management measures is imposed directly on NCP by HKSCC (this concept is consistent with the handling of DCP today as no risk management measure is imposed by HKSCC directly on DCP's clients).

The Guarantee Fund Contribution mechanism applies to both DCP and GCP who assumes all clearing obligations of its NCPs. While a DCP is subject to a minimum cash contribution of the higher of HK\$50,000 or HK\$50,000 per each Stock Exchange Trading Right held by the DCP, the minimum cash contribution of a GCP

is the higher of HK\$150,000 or the sum of HK\$50,000 per each Stock Exchange Trading Right held by the GCP (if applicable) and HK\$50,000 per each NCP engaged. Both DCP and GCP are required to make regular contribution to the Guarantee Fund, the amount of which is determined by reference to the DCP's or GCP's share of the average daily CNS positions for the most recent 60 Business Days subject to their respective minimum contributions. It should be noted that whenever the Guarantee Fund Contribution of a DCP or GCP is applied, the DCP or GCP is required to promptly replenish the deficiency of its contributions in the events occurring before the termination of its participation in CCASS. Even if a DCP or GCP opts out for contributions exceeding limit, by electing to terminate its participation in CCASS, the replenished amount will be equal to GCP's required contribution at the date of receipt by HKSCC of such termination (opt out) notice, plus two times such amount.

## **8. Special Trading Arrangement for NCP**

An Exchange Participant is not allowed to trade on SEHK if it cannot cause all its Exchange Trades, and if applicable, China Connect Securities Trades to be settled through CCASS in accordance with the CCASS Rules. In the case of an NCP, it means that the NCP will not be allowed to trade if it does not have a valid, binding and effective Clearing Agreement with a GCP(s) (any GCP who is subject to such Clearing Agreement with an NCP shall hereinafter be referred to as a "Subsisting GCP") for the clearing of its Exchange Trades, and if applicable, China Connect Securities Trades. Unless otherwise terminated, the Clearing Agreement is deemed to be terminated when the GCP is declared as a defaulter (and hence ceases to be a CCASS Participant) or suspended from further activities in CCASS under the CCASS Rules. Similar to the practice of other international markets, trading restriction on an NCP when its GCP is suspended or terminated will continue until the NCP has appointed another GCP to clear its trades or become a DCP or, if applicable, CCCP.

It is one of the CCEP registration criteria that the Exchange Participant must either be a Clearing Participant of HKSCC or has in place a Subsisting GCP for the clearing of its China Connect Securities Trades. An Exchange Participant which is a Clearing Participant of HKSCC shall itself clear, and shall not be allowed to appoint a GCP to clear, its China Connect Securities Trades.

For an Exchange Participant which has appointed two different GCPs for the clearing of its Exchange Trades and China Connect Securities Trades, if, subsequently, (1) the Exchange Participant cease to have a Subsisting GCP for the clearing of its Exchange Trades (including the situation where the appointed GCP is suspended from further activities in Central Clearing and Settlement System ("CCASS") under the General Rules of CCASS), it will not be allowed to conduct trading in China Connect Securities even if it still has a Subsisting GCP for the clearing of its China Connect Securities Trades; and (2) the Exchange Participant cease to have a

Subsisting GCP for the clearing of its China Connect Securities Trades (including the situation where the appointed GCP is suspended from further activities in CCASS under the General Rules of CCASS), the Exchange Participant may continue to conduct Exchange Trades if it still has another Subsisting GCP for the clearing of its Exchange Trades, and it continues to fulfil all other criteria as an Exchange Participant.

As an NCP has to enter into a Clearing Agreement with each of its appointed GCP(s), an NCP which has appointed different GCPs for the clearing of its Exchange Trades and China Connect Securities Trades is required to submit a completed Form 11 – Notification of Execution of Clearing Agreement and Change of Clearing Relationship to SEHK in respect of each such appointment.

In the case of termination of a Clearing Agreement, the NCP/GCP shall submit the Form 12 - Notification of Termination of Clearing Agreement to SEHK. The party who initiates the termination is also required to inform the other party to the Clearing Agreement at the same time. The NCP and the GCP are obliged to notify SEHK and HKSCC respectively as early as possible once a decision to terminate a Clearing Agreement has been made. When HKSCC receives a termination notice from a GCP, HKSCC will acknowledge the receipt of such termination notice in writing (with a copy to the NCP concerned) confirming the effective date of the termination of the Clearing Agreement and unless and until that date, the Clearing Agreement shall be treated as valid, binding and effective notwithstanding any provision to the contrary in the Clearing Agreement and/or the termination notice. In addition, upon receipt of the termination notice and where the NCP is also a SEOCH Participant, HKSCC will notify SEOCH of such termination. The NCP concerned will not be allowed to trade in the relevant market(s) once termination is effective until the NCP has appointed another GCP or become a DCP or, if applicable, CCCP. The GCP concerned is continued to be held responsible for clearing all Exchange Trades, Clearing Agency Transactions and China Connect Securities Trades, as applicable, executed by the NCP before the termination of the Clearing Agreement between them becomes effective.

## **9. Fee Structure**

The existing CCASS tariff applies to all Clearing Participants. Whether additional CCASS service fee is applicable under the TPC model is subject to review from time to time, although this is not anticipated at this stage. Finally, as NCP is not a CCASS Clearing Participant, it will not be subject to any CCASS service fees.
