

Packaged Retail and Insurance-based Investment Products (“PRIIPs”) Regulation – Key Information Document (“KID”): Hong Kong Futures Exchange Futures Contracts

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product covered by this KID: Futures Contracts available for trading on the Hong Kong Futures Exchange

Name of product manufacturer: Hong Kong Futures Exchange Limited (“HKFE”)

Website of product manufacturer: <http://www.hkex.com.hk>

More information: Call +852 2522 1122 for more information

Competent Authority: Securities and Futures Commission (<http://www.sfc.hk>) is responsible for supervising HKFE

Date of production of the KID: 30 April 2024

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type: Futures Contracts (with stock index, stock, interest rate, currency or metal as their underlying asset)

Term: HKFE products have a range of contract months on which you can choose for your contract to be settled.

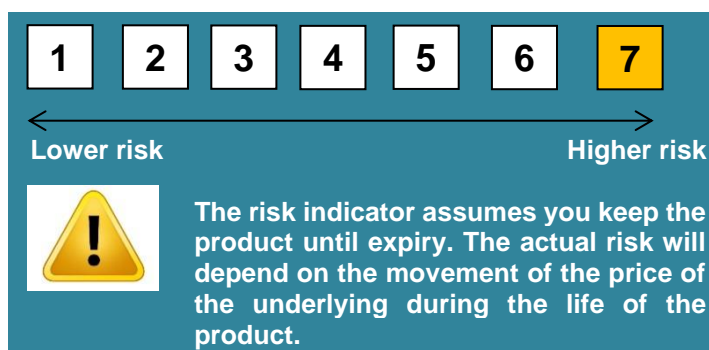

Objectives: This is a derivative contract under which you agree to buy from, or sell to, a counterparty either: an entitlement to the underlying asset at a future date (in relation to physically delivered Futures Contracts); or an exposure to the price of the relevant underlying asset (for cash settled Futures Contracts). The value of the Futures Contract will be linked to the price of the underlying asset – see “Investment Performance Information” below for further information.

Intended retail investor: Retail investors should carefully consider whether trading this product is appropriate for them in light of their experience, objectives, financial resources and other relevant circumstances as considerations specifically relevant to retail investors have not been taken into account in the design of the product.

What are the risks and what could I get in return?

Risk Indicator -

This product is rated as a **7 out of 7** on the basis of the risk chart below.

The summary risk indicator is a guide to the level of risk of this product. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as **7 out of 7**, which is the highest risk class. We have classified this product as 7 out of 7 because this product is complex, and there is a risk that you could lose considerably more money than you invested. This rates the potential losses from future performance at a very high level.

Be aware of currency risk. For Currency Futures, you may receive payments in a different currency so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

Transactions in Futures Contracts traded on HKFE are leveraged. A relatively small market movement will have a proportionately larger impact on the funds you have deposited. You may sustain a total loss of initial margin funds and any additional funds deposited and if the market moves against your position, you may be called upon to pay substantial additional funds on short notice to maintain your position. Failure to do so may result in your position being liquidated at a loss and you will be liable for any resulting deficit.

Investment performance information

Several factors could affect future returns in the product, such as but not limited to, current supply and demand of the underlying metal, the outlook of supply and demand, the cost of storage, interest rates, liquidity, market positioning and other fundamental and technical trading factors.

Cash settled Futures Contracts will be settled based on the Final Settlement Price of the underlying asset on the Last Trading Day or other day as determined in accordance with the Contract Specifications. For cash settled Futures Contracts, the relevant benchmark is the price of the underlying assets (e.g. stock index, stock, interest rate, currency, metal or other commodities).

Physical settled Futures Contracts will be settled by delivery of the underlying asset by short position holders of such Contracts and by payment of cash by long position holders of such Contracts on Final Settlement Day as prescribed in the Contract Specifications. For physical settled Futures Contracts, the relevant benchmark is the price of the underlying assets (e.g. currency, metal or other commodities).

What could affect my return positively?

Positive returns in the product would depend on the movement of the price of the underlying asset driven by the fundamental and technical trading factors described above. This is dependent on the movements of the prices in the market of the relevant underlying asset. If you are long futures and the underlying asset price increases, it will positively affect your return. The graph below illustrates how your investment could perform. You can compare them with the pay-off graphs of other derivatives.

What could affect my return negatively?

Negative returns in the product would depend on the movement of the price of the underlying asset. This is dependent on the movements of the prices in the market of the relevant underlying asset's market. If you are long futures and the price decreases, it will negatively affect your return. For contracts listed on HKFE, there is no contractual limit to the loss that you could incur under this product. Your contract with your broker may include a contractual limitation on your maximum loss, but this would be a matter to be confirmed with the broker that has sold you the product.

In the event that this product is settled in circumstances where there are severely adverse market conditions, it is possible that you may not recover your expected return.

The figures shown include all the costs of the product itself, but do not include any transactional costs that you pay to your broker. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if HKFE is unable to pay out?

HKFE is a market operator and will not be a counterparty to the Contracts entered into by its Participants. This product is registered and cleared by HKFE Clearing Corporation Limited (“HKCC”), a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited. HKCC acts as the counterparty to the Contracts, which effectively eliminates counterparty risks between its Participants. HKCC’s acting as central counterparty does not cover any Participant’s obligations to its clients. Investors should exercise due care and diligence when deciding through whom they will conduct business. There are circumstances where investors may face a financial loss due to the default of the broker. Please refer to your broker for further information, including whether it will be possible to claim under any investor compensation scheme in the event of your broker’s default. We suggest you consult with your broker to confirm what arrangements may apply in the event of their default and potential options for mitigating your risks of loss in such circumstances.

What are the costs?

HKFE does not charge retail clients directly. The person selling you or advising you about this product (your broker) may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time. In the interests of transparency, details of trading and clearing fees that your broker pays when trading on HKFE can be found here: http://www.hkex.com.hk/Services/Rules-and-Forms-and-Fees/Fees/Listed-Derivatives/Trading/Transaction?sc_lang=en.

How long should I hold it and can I take money out early?

Recommended holding period: There is no recommended or minimum holding period. HKFE Futures Contracts have a range of expiry dates which you can choose or you can close out your positions in the open market before expiry. Which expiry date to choose and whether or not to hold until expiration will depend on your investment strategy and your risk profile. Please speak to your broker for further information.

How can I complain?

In the first instance we recommend you speak to your broker in relation to any complaints. Complaints to HKFE can be made by mail, email, fax or via hotline. The complaint should include sufficient information to allow HKFE to properly identify the trade(s) or activity complained of and establish the basis for any alleged loss. Details of HKFE's complaints procedure are available at http://www.hkex.com.hk/Global/Exchange/Contact?sc_lang=en. Complaints regarding intermediaries, including Participants of HKFE, can also be made to the Securities and Futures Commission. Details of the Securities and Futures Commission's complaints procedure are set out in <http://www.sfc.hk/web/EN/lodge-a-complaint/>.
