

Knowing Your Value Chain A Need & An Opportunity

Prof. Christine Loh

Institute for the Environment

17 November 2022

Sustainability – gone mainstream

Every government is at COP27

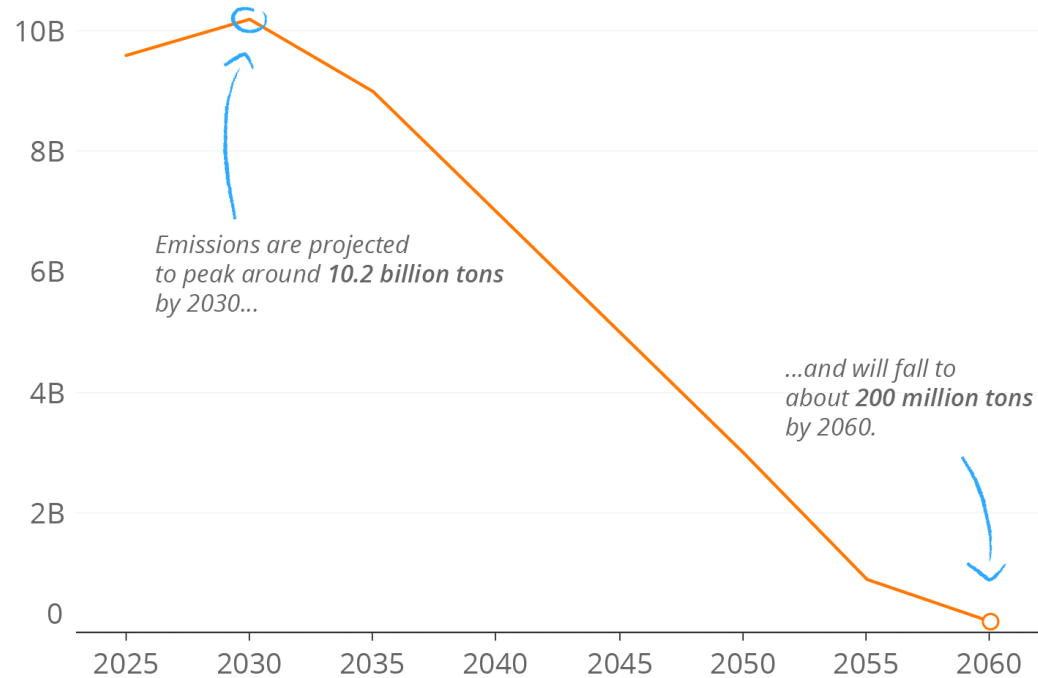

Climate is globally important, and China is a major influence

China's decarbonization: 2030/2060

Precipitous decline

Projected Chinese carbon emissions, billion tons

Emissions are projected to peak around 10.2 billion tons by 2030...

...and will fall to about 200 million tons by 2060.

new ideas!

From Chaos to Order in ISSB

ISSB and You:

Global baseline of sustainability disclosure for capital market

- Sustainability Disclosure - governance, strategy, risk management, and metrics and targets.
- Disclosures to focus on how sustainability affect enterprise value.
- Reporting to connect to financial statements and released at the same time.

Summary

- Sustainability is here to stay.
- Drivers are coming from science, politics & governments.
- Governments are adopting global standards.
- Companies and Banks are on board.
- SMEs are affected too.
