

Appendix I

Bank of China Limited

Description on Bank of China Singapore Branch's 2021 Green Bond

Bank of China Limited (the "Bank") has established the *Bank of China Limited Sustainability Series Bonds Management Statement* (the "Management Statement"). This Management Statement has been prepared to demonstrate the Bank will issue green bond in accordance with the *Green Bond Principles 2018* published by International Capital Market Association.

Use of Proceeds

All the net proceeds of the green bond will be allocated to the Eligible Projects as defined in the *Green Bond Principles 2018*.

In any case, Eligible Projects exclude the following categories ("Explicitly Excluded Projects"):

- Fossil fuel dedicated assets
- Biofuels, biogas or biomass which utilize food crops as sources
- Nuclear related projects
- Mining and quarrying related projects
- Luxury services or goods related, such as clubhouse operation
- Alcoholic beverages related projects
- Gambling and predatory lending enterprises related projects
- Tobacco and tobacco-related products related projects
- Weapons and ammunitions related projects.

Project Evaluation and Selection

1. Preliminary Screening

Based on the project compliance documents and referring to criteria and standards of Eligible Project categories defined in the Management Statement, the Bank's domestic and overseas branches shall conduct preliminary screening of eligible projects, to form the list of nominated projects and submit to the Headquarters for further review.

2. Review and Approval

The Bank's Headquarters shall review each of the nominated projects, and then submit to professional third party agencies for an independent assessment. Approval will be granted to nominated projects certified by the professional third party agencies. The approved projects will form the Eligible Project List.

3. Update and Maintenance

The Bank's Headquarters shall review the Eligible Project List on a quarterly basis and determine if any change(s) is necessary (for example, if a project has become ineligible due to amortization, prepayment, sale or other reasons). If such change(s) is necessary, the Headquarters shall organize domestic and overseas branches to nominate new projects and approve the eligible ones to replace projects that have become ineligible due to amortization, prepayment, sale or other reasons.

Management of Proceeds

1. Planning for Use of Proceeds

Prior to the issuance of green bond, the Bank shall develop the preliminary Eligible Project List to ensure that the proceeds from green bond can be allocated to Eligible Projects in a timely manner.

2. Management of Separate Ledger

The Bank shall record the source and allocation of proceeds in a separate ledger management system to ensure that all the net proceeds of the green bond are properly managed and used. The ledger system shall contain information including but not limited to:

- Transaction information (issue amount, coupon, issue date and maturity date, etc.)
- Proceeds allocation information (project name, borrower description, project category, balance, release date, repayment date, exchange rate, interest rate of the loan, etc.)

The Bank will review and update the ledger on a quarterly basis. Any proceeds allocated to the projects that have amortized, been prepaid, sold or otherwise become ineligible shall be reallocated to newly nominated and approved projects.

3. Use of Unallocated Proceeds

Unallocated proceeds shall not be invested in greenhouse gas (GHG) intensive, highly polluting, energy intensive projects nor projects with negative social impacts (including but not limited to "Explicitly Excluded Projects"). The unallocated proceeds could be temporarily invested in green bond issued by non-financial institutions in domestic or international capital markets, and in money market instruments with good credit ratings and market liquidity, or kept in cash until they are allocated to Eligible Projects.

Reporting

The Bank will make disclosure in relation to the allocation of the proceeds and the environmental impacts of the funded Eligible Projects on an annual basis on its official website (<http://www.boc.cn/en/investor/ir10/>) so long as green bond remains outstanding. The following contents will be disclosed annually:

- Annual report of the green bond, where the content includes but not limited to the following proceeds allocation and environmental impacts information:
 - ✓ A brief description of the Eligible Projects to which the proceeds were allocated, and the breakdown in terms of amount and percentage allocated to each of the categories
 - ✓ The unallocated proceeds and how they are invested temporarily
 - ✓ Appropriate case information of the selected Eligible Projects
 - ✓ The environmental benefits of each category of the Eligible Projects where the proceeds were allocated
- An attestation report for the annual report issued by a qualified third party
- An attestation report for the use of proceeds issued by a qualified third party

Eligible Project List

The Bank has established a list of eligible projects, with an approximated total value of RMB 3,390.25 million. Nominated projects list may evolve over time. The following is detailed information of the eligible project.

Eligible Project List

No.	Region	Project	Eligible Project Categories	Loan Amount (RMB million)
1	Southern China	Photovoltaic power project	Renewable energy	127.88
2	Southern China	Metro project	Clean transportation	1,778.87
3	Central China	Metro project	Clean transportation	750.00
4	Overseas	Green building project	Green buildings	733.50
Total Loan Amount (RMB million)				3,390.25

Category	Loan Amount (RMB million)	Number of Projects	Loan Proportion
Renewable energy	127.88	1	3.77%
Green buildings	733.50	1	21.64%
Clean transportation	2,528.87	2	74.59%
Total	3,390.25	4	100.00%

Region	Loan Amount (RMB million)	Number of Projects	Loan Proportion
Southern China	1,906.75	2	56.24%
Central China	750.00	1	22.12%
Overseas	733.50	1	21.64%
Total	3,390.25	4	100.00%

The following sets forth certain information of sample eligible projects:

- A photovoltaic power project located in Southern China. The project, with total capacity of about 110 MWp, consists of 252,720 mono-crystalline solar modules with per capacity of 435 Wp and electricity generation of about 124,014 MWh annually, which will result in the CO₂ emissions reduction about 85,495 tons/year. The Bank's loan to this project accounted for approximately 24.46% of the total project investment, which is expected to reduce CO₂ by 20,915 tons/ year.
- A metro project located in Southern China. The total length of the metro is 33.6km with 23 stations. The line, with the expecting capacity of 321,500 passengers/ day in the prime stage, is expected to reduce CO₂ by 50,384 tons/ year. The Bank's loan to this project accounted for approximately 9.93% of the total project investment, which is expected to reduce CO₂ by 5,004 tons/ year in the prime stage.
- A green building project located in Singapore. The project employs both of passive design and active solutions for its green features. Besides incorporating lush greenery the building is designed with a high performance building envelope such as low emissivity double glazed glass to reduce heat gain into the building. To cut down on the energy consumption, there is also a highly efficient air conditioning and lighting system, as well as sensors in the stairway. In recognition of the development's environmentally-friendly design, the Singapore's Building and Construction Authority has conferred it a Green Mark Gold^{PLUS} rating.
