Environmental, Social and Governance Reporting Guide

Part A: Introduction

The Guide

1. This Guide comprises two levels of disclosure obligations: (a) mandatory disclosure requirements; and (b) “comply or explain” provisions.
2. Mandatory disclosure requirements are set out in Part B of this Guide. An issuer must include such information for the period covered by the ESG report.
3. “Comply or explain” provisions are set out in Part C of this Guide. An issuer must report on the “comply or explain” provisions of this Guide. If the issuer does not report on one or more of these provisions, it must provide considered reasons in its ESG report. For guidance on the “comply or explain” approach, issuers may refer to the “*What is “comply or explain”?*” section of the Corporate Governance Code and Corporate Governance Report (“Corporate Governance Code”) in Appendix 14 of the Main Board Listing Rules.
4.
 - (1) An issuer must publish its ESG report on an annual basis and regarding the same period covered in its annual report. An ESG report may be presented as information in the issuer’s annual report or in a separate report. Regardless of the format adopted, the ESG report must be published on the Exchange’s website and the issuer’s website.
 - (2) Where the ESG report does not form part of the issuer’s annual report:
 - (a) To the extent permitted under all applicable laws and regulations and the issuer’s own constitutional documents, an issuer is not required to provide the ESG report in printed form to its shareholders irrespective of whether such shareholders have elected to receive the issuer’s corporate communication electronically or otherwise under rule 2.07A.
 - (b) The issuer must notify the intended recipient of:
 - (i) the presence of the ESG report on the website;
 - (ii) the address of the website;

- (iii) the place on the website where it may be accessed; and
 - (iv) how to access the ESG report.
- (c) Notwithstanding the above, the issuer shall promptly provide a shareholder with an ESG report in printed form upon its specific request.
- (d) The issuer is encouraged to publish the ESG report at the same time as the publication of the annual report. In any event, the issuer should publish the ESG report as close as possible to, and no later than five months after, the end of the financial year.

Overall Approach

5. This Guide is organised into two ESG subject areas (“Subject Areas”): Environmental (Subject Area A) and Social (Subject Area B). Corporate governance is addressed separately in the Corporate Governance Code.
6. Each Subject Area has various aspects (“Aspects”). Each Aspect sets out general disclosures (“General Disclosures”) and key performance indicators (“KPIs”) for issuers to report on in order to demonstrate how they have performed.
7. In addition to the “comply or explain” matters set out in this Guide, the Exchange encourages an issuer to identify and disclose additional ESG issues and KPIs that reflect the issuer’s significant environmental and social impacts; or substantially influence the assessments and decisions of stakeholders. In assessing these matters, the issuer should engage stakeholders on an ongoing basis in order to understand their views and better meet their expectations.
8. This Guide is not comprehensive and the issuer may refer to existing international ESG reporting guidance for its relevant industry or sector. The issuer may adopt international ESG reporting guidance so long as it includes comparable disclosure provisions to the “comply or explain” provisions set out in this Guide.
9. The issuer may seek independent assurance to strengthen the credibility of the ESG information disclosed. Where independent assurance is obtained, the issuer should describe the level, scope and processes adopted for the assurance given clearly in the ESG report.
10. The board has overall responsibility for an issuer’s ESG strategy and reporting.

Reporting Principles

11. The following Reporting Principles underpin the preparation of an ESG report, informing the content of the report and how information is presented. An issuer should follow these Reporting Principles in the preparation of an ESG report:
 - (1) **Materiality:** The threshold at which ESG issues determined by the board are sufficiently important to investors and other stakeholders that they should be reported.
 - (2) **Quantitative:** KPIs in respect of historical data need to be measurable. The issuer should set targets (which may be actual numerical figures or directional, forward-looking statements) to reduce a particular impact. In this way the effectiveness of ESG policies and management systems can be evaluated and validated. Quantitative information should be accompanied by a narrative, explaining its purpose, impacts, and giving comparative data where appropriate.
 - (3) **Balance:** The ESG report should provide an unbiased picture of the issuer's performance. The report should avoid selections, omissions, or presentation formats that may inappropriately influence a decision or judgment by the report reader.
 - (4) **Consistency:** The issuer should use consistent methodologies to allow for meaningful comparisons of ESG data over time.

Complementing ESG discussions in the Business Review Section of the Directors' Report

12. Pursuant to paragraph 28(2)(d) of Appendix 16 of the Main Board Listing Rules, an issuer's directors' report for a financial year must contain a business review in accordance with Schedule 5 to the Companies Ordinance. The business review must include, to the extent necessary for an understanding of the development, performance or position of the issuer's business:
 - (i) a discussion of the issuer's environmental policies and performance;
 - (ii) a discussion of the issuer's compliance with the relevant laws and regulations that have a significant impact on the issuer; and
 - (iii) an account of the issuer's key relationships with its employees, customers and suppliers and others that have a significant impact on the issuer and on which the issuer's success depends.

This Guide should complement the content requirements of the directors' report, as it calls for issuers to disclose information in respect of specific ESG areas.

Part B: Mandatory Disclosure Requirements

Governance Structure

13. A statement from the board containing the following elements:
 - (i) a disclosure of the board's oversight of ESG issues;
 - (ii) the board's ESG management approach and strategy, including the process used to evaluate, prioritise and manage material ESG-related issues (including risks to the issuer's businesses); and
 - (iii) how the board reviews progress made against ESG-related goals and targets with an explanation of how they relate to the issuer's businesses.

Reporting Principles

14. A description of, or an explanation on, the application of the following Reporting Principles in the preparation of the ESG report:

Materiality: The ESG report should disclose: (i) the process to identify and the criteria for the selection of material ESG factors; (ii) if a stakeholder engagement is conducted, a description of significant stakeholders identified, and the process and results of the issuer's stakeholder engagement.

Quantitative: Information on the standards, methodologies, assumptions and/or calculation tools used, and source of conversion factors used, for the reporting of emissions/energy consumption (where applicable) should be disclosed.

Consistency: The issuer should disclose in the ESG report any changes to the methods or KPIs used, or any other relevant factors affecting a meaningful comparison.

Reporting Boundary

15. A narrative explaining the reporting boundaries of the ESG report and describing the process used to identify which entities or operations are included in the ESG report. If there is a change in the scope, the issuer should explain the difference and reason for the change.
