Adjustment Formula:

Adjusted Previous Closing Price

$$= [(Closing Price on the last cum-all trading day \times Y) + (S \times X)] \div (X + Y)$$

where:

S = Subscription price per offer share, i.e. HK\$0.10

X = Number of offer shares a shareholder is entitled to subscribe when he/she holds Y existing shares on the record date, i.e. 1 offer share

Y = Number of existing shares a shareholder has to hold on the record date for entitling him/herself to subscribe for X offer shares, i.e. 2 shares

Note: Price adjustment for open offer will not be made and the previous closing price will remain unchanged on ex-all date when the subscription price is higher than the closing price of the shares on the last cum-all trading day.
