Question 1.1(a)

Do you agree with our proposal to exclude securities that do not contribute to an open market in trading in Hong Kong from the calculation of the public float by requiring the public float percentage of securities new to listing be calculated normally by reference to the total number of securities of that class only (as set out in paragraph 44 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

By excluding shares that do not contribute to an open market in Hong Kong, the public float calculation will better reflect the liquidity available to investors. For listed companies, particularly those with complex share structures, the proposed changes will make it easier for investors to understand and determine the actual public float.

Yes

Please give reasons for your views and any alternative suggestions.

Question 1.1(c)

Do you agree with our proposal to exclude securities that do not contribute to an open market in trading in Hong Kong from the calculation of the public float by in the case of a PRC issuer with other listed shares (e.g. A shares listed on a PRC stock exchange), requiring the numerator of its public float percentage to be calculated by reference to its H shares only, such that any other listed shares it has in issue would only be included in the denominator (as set out in paragraph 45 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 1.1(d)

Do you agree with our proposal to exclude securities that do not contribute to an open market in trading in Hong Kong from the calculation of the public float by in the case of an issuer with other share class(es) listed overseas, requiring the numerator of its public float percentage at listing to be calculated by reference to only the shares of the class for which listing is sought in Hong Kong, such that any shares of other classes it has in issue would only be included in the denominator (as set out in paragraph 46 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 1.2

Do you agree with our proposal to modify the requirement of MB Rule 8.09(1) (GEM Rule 11.23(2)(a)) to clarify that the minimum market value in public hands requirement applies to the securities for which listing is sought (as set out in paragraph 47 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

The proposed modification will eliminate ambiguity by explicitly stating that the minimum market value requirement applies to the securities for which listing is sought.

Question 2.1

Yes

Please give reasons for your views and any alternative suggestions.

The proposed change will provide clear guidance and further reduce relevant loopholes for the definition of "the public".

Question 2.2

Do you agree with our proposal to regard shares held by an independent trustee which are granted to independent scheme participants and unvested as shares held in public hands (as set out in paragraph 65 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 3.1

Do you agree that we should replace the current minimum initial public float thresholds with tiered initial public float thresholds according to the expected market value of the class of securities for which listing is sought on the Exchange at the time of listing?

Yes

Please give reasons for your views and any alternative suggestions.

The tiered approach aligns with international standards and makes Hong Kong's listing requirements more competitive. It provides greater flexibility for issuers, especially those with larger market capitalizations, while ensuring sufficient liquidity and market interest. Additionally, such proposed structure also removes the original discrepancy of some marginal cases which lower market-cap listing may end up having higher minimum public flow requirement, ensuring consistency and market fairness.

Question 3.2

Do you agree with the proposed tiered initial public float thresholds (as set out in Table 5 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 3.3(a)

Do you agree that the proposed tiered initial public float thresholds should be applied to any class of equity securities new to listing on the Exchange, except for the initial listing of A+H issuers (and other prescribed types of issuers)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 3.3(b)

Do you agree that the proposed tiered initial public float thresholds should be applied to any class of equity securities new to listing on the Exchange, except for a bonus issue of a new class of securities (as set out in paragraph 79 of the Consultation Paper)?

Yes

Please give reasons for your views and any alternative suggestions.

Question 3.4

Do you agree that all issuers disclose, in their listing documents, the initial public float threshold that is applicable to the class of securities they seek to list on the Exchange?

Yes

Please give reasons for your views and any alternative suggestions.

For investors, transparent disclosure is always welcome and we praise the Exchange for considering this.

Question 3.5

Do you agree that the same tiered initial public float thresholds (as set out in Table 5 of the Consultation Paper) should be applied to GEM issuers?

Yes

Please give reasons for your views and any alternative suggestions.

Question 4.1(a)

If our proposed initial public float thresholds (see proposals in Section I.B.1 and Section I.D.1 of Chapter 1 of the Consultation Paper) are supported by the market, we seek views on the appropriate ongoing public float requirements for issuers, subject to the initial public float tiers proposed (see Table 5 in Section I.B.1 of Chapter 1 of the Consultation Paper). Please give reasons for your views and any alternative suggestions.

Please see below responses.

Question 4.1(b)

If our proposed initial public float thresholds (see proposals in Section I.B.1 and Section I.D.1 of Chapter 1 of the Consultation Paper) are supported by the market, we seek views on the appropriate ongoing public float requirements for: A+H issuers and other prescribed types of issuers (see Section I.D.1 of Chapter 1 of the Consultation Paper). Please give reasons for your views and any alternative suggestions.

Question 4.2

Should issuers be allowed the flexibility to maintain a lower public float level, after listing, than that required at listing, in view of the issues we have described in the Consultation Paper (see paragraphs 102 to 109 of the Consultation Paper)?

Yes

Please give reasons for your views.

We welcome HKEX's consideration on this front, which helps issuers manage their capital structure without compromising market liquidity, while also ensuring investors' rights are duly protected.

In addition, we would like to suggest the Exchange to broaden such scope to also allow flexibility of lowering ongoing public float for other products in the market, such as SPAC. We noticed some SPACs in the market faced suspension simply because of change in the Company's public float arises directly from the Share Redemption, a mechanism intrinsic to SPACs and their de-SPAC transactions. As such, we would suggest that in the future, the Exchange may consider refining and tailoring the ongoing public float requirements for SPACs to accommodate this product's unique characteristic.

Question 4.3

Should the existing regulatory approach of suspending trading of issuers with public float below a prescribed level (see paragraph 92(c) of the Consultation Paper) be maintained, in view of the issues we have described in the Consultation Paper (see paragraphs 110 to 111 of the Consultation Paper)?

No

Please give reasons for your views.

In reality, such approach may sometimes deprive shareholders/minority investors of their ability to trade out of the position.

Do you agree that ongoing public float requirements should be applied to shares only (as set out in paragraph 118 of the Consultation Paper)?

Yes

Yes

Please give reasons for your views and any alternative suggestions.

Question 4.6(a)

What are your views on the potential benefits and risks of establishing an OTC market? Please give reasons for your views.

Taking reference from the practices of other Exchanges globally, an OTC market can increase market depth and improve overall market liquidity and activity. However, we are also conscious that the risk of market manipulation or lack of transparency may be higher in OTC market and would require the Exchange to have additional comprehensive regulatory oversights on this before establishing such OTC market in HK.

Question 4.6(b)

What are your views on functions that an OTC market should serve? Please give reasons for your views.

What are your views on whether such OTC market should be open to retail investors? Please give reasons for your views.

allow a staggered release of the six-month lock-up (as set out in Option B in paragraph 205 of the Consultation Paper)

Please give reasons for your views and any alternative suggestions.

A staggered lock-up release reduces the risk of significant price volatility when the lock-up period expires. By releasing 50% of the shares after three months and the remaining 50% after six months, the impact on the market is spread out over a longer period. Additionally, staggered releases arguably provide a more stable trading environment, which can enhance investor confidence in the stock's performance post-IPO.
