通告 CIRCULAR

事項

Subject: Order Price and Volume Deviation Settings on HKATS

查詢

Enquiry: HKATS Hotline 2211-6360

Reference is made to the Exchange circular dated 17 January 2013 (Ref: DMD/011/13).

To mitigate the risk on input errors, Exchange Participants ("EPs") are requested to review and determine the maximum allowable order price deviation and volume parameters with "Restriction" as the action type according to their own trading patterns, practice and risk management requirements. The parameter setting is to be set at HKATS user and workstation level. EPs using OMnet Application Programming Interface ("OAPI") are also requested to review and determine similar price and quantity limits in their systems to minimize error trades resulted from orders entered erroneously.

EPs who have changed the parameters are reminded to complete and return the attached confirmation form for each CLICK workstation by fax or email on or before 28 February 2014.

It should be noted that this is an additional control measure to prevent error trade and it is not intended to replace any of the EPs' existing internal controls or preventative arrangements. EPs are fully responsible for maintaining proper operational procedures and internal controls in handling clients' orders and transactions.

For detailed procedures on parameter settings on CLICK workstations, please refer to Section 6.5 of the HKATS User's Guide.
