HKEx's practice in updating the record of Number of Issued Shares of Hong Kong Listed Companies

The number of issued shares provided in Securities Attribute Data is based on the record kept by HKEx which is updated with the following practices :

1. The movement of issued share capital is largely based on the monthly report submitted by the listed companies. In general, the listed companies submit the report not later than the 10th day of each month. The number of issued shares as at the end of the previous month is provided in the monthly report.

2. On receiving the monthly reports, HKEx starts updating the records which will usually have completed by the 15th day of the month

3. Points 1. and 2. imply that there is a time lag between the actual effective date of the new issued share capital and the date when the figure becomes available

4. In case of bonus or rights issues, the number of issued shares will be adjusted accordingly with effect from the ex-date

5. In case of share splits or share consolidations, the number of issued shares will be adjusted accordingly with effect from the effective date

6. Other capital changes such as placing shares, share subscription and consideration issues, etc., the number of issued shares will be updated only after the shares concerned have been issued and allotted to the shareholders.

The number of issued shares of the NASDAQ stocks traded under the "Pilot Programme for Trading US Securities" is obtained from the NASDAQ website and provided for reference only
